WHY THE RIGHT POOL CHEMICALS MATTER

Our range works together to keep your pool performing at its best. Sanitisers and shock treatments control bacteria, algaecides prevent and remove algae, adjusters and balancers maintain ideal water chemistry, and clarifier solutions restore sparkle and clarity. For ongoing care, IQ's maintenance, stain, and spa solutions help protect finishes, simplify upkeep, and ensure lasting performance.

With IQ Pool Chemicals, maintaining professional grade water quality is simple, reliable, and effective – all year round.

REMINDER

Always handle pool chemicals with care. Never mix different chemicals together. Always add chemicals to water, never the reverse. Wear appropriate protective equipment when handling. Ensure all buckets and tools are thoroughly rinsed before and after use to avoid cross-contamination of chemicals.

SANITISERS

Clean, safe water starts with reliable sanitation.

IQ Sanitisers are trusted by professionals and pool owners alike to deliver consistent sanitation performance across all pool types: residential, commercial, indoor and outdoor.

From fast acting granular to long lasting stabilised tablets, the IQ sanitiser range offers a solution for every pool and every application.

KEY BENEFITS

- High quality chlorine formulations for consistent sanitising power
- Options for daily dosing, shock treatment, and long term control
- Multiple sizes available to suit your needs including retail packs and bulk packaging
- Trusted performance with minimal residue

NON STABILISED

IQ Maxi Chlor 700 Calcium Hypochlorite

Control of algae and bacteria in indoor and outdoor swimming pools

Formulation

700 g/kg available Chlorine present as Calcium Hypochlorite (High Quality Granular)

Alkaline pH 10 - 12

Application

Suited for shock treatment and super chlorination. If used for maintaining chlorine, please note that it will slowly raise the calcium levels in the pool.

35g per 10,000 litres per day (Stabilised pools)

70g per 10,000 litres per day (Non-stabilised pools)

Available sizes

2kg, Reece Code: 1537265

10kg, Reece Code: 1537267

IQ Granu Chlor 700 Calcium Hypochlorite

Control of algae and bacteria in commercial swimming pools

Formulation

700 g/kg available Chlorine present as Calcium Hypochlorite. Formulated specifically for use in IQ Granudos Feeder Systems.

Alkaline pH 10 – 12

Application

Automatically dosed by IQ Granudos systems on demand as required

Available sizes

10kg, Reece Code: 1537269

*Please note: dosage rates change depending on desired outcome and current water quality. Replenish as required. Application rates indicated are to be used as a guide only.

STABILISED

IQ Maxi Chlor Stabilised Granular Chlorine / Salt Boost

Control of algae and bacteria in indoor and outdoor swimming pools

Formulation

630 g/kg available Chlorine present as Sodium Dichloroisocyanurate

Small granular size and de-dusted. Fast dissolving leaving no residue, it is an ideal product for regular sanitising treatment of swimming pools and also as a supplementary chlorine for saltwater pools.

Slightly acidic pH 6 - 6.5

Application

8 - 20 g per 10,000 litres per day
or 25 – 30 g every other day

Add directly to pool water or pre-dissolve in bucket of water.

Available sizes

2kg, Reece Code: 1537290
4kg, Reece Code: 1537291
10kg, Reece Code: 1537292
25kg, Reece Code: 1537293

IQ Maxi Chlor Stabilised Tablets

Control of algae and bacteria in indoor and outdoor swimming pools

Formulation

900 g/kg available Chlorine present as Trichloroisocyanuric Acid in 200g tablets

Acidic pH 2 – 3

Application

1 tablet per 20,000 litres placed in a floating dispenser or semi-automatic dispenser. Replenish as required (slow dissolving and long lasting).*

Available sizes

2kg, Reece Code: 1537283
10kg, Reece Code: 1537284

*Please note: dosage rates change depending on desired outcome and current water quality. Replenish as required. Application rates indicated are to be used as a guide only.

IQ Maxi Chlor 5 in 1 Stabilised Tablets

Control of algae and bacteria in indoor and outdoor swimming pools

Formulation

800 g/kg available Chlorine present as Trichloroisocyanuric Acid, 7.5g/kg Copper present as Copper Sulphate Pentahydrate also contains built in clarifier (alum) in 250g tablets.

Acidic pH 2 - 3

Maintenance Application

1 tablet per 20,000 litres placed in a floating dispenser or semi-automatic dispenser. Replenish as required (slow dissolving and long lasting). Please note: dosage rates change depending on desired outcome and current water quality. Replenish as required. Application rates indicated are to be used as a guide only.

Available sizes

2kg, Reece Code: 1537279
10kg, Reece Code: 1537280

IQ Ezi Chlor

Control of algae and bacteria in outdoor swimming pools

Formulation

810 g/kg available Chlorine present as Trichloroisocyanuric Acid and 100 g/kg Tetraborate Pentahydrate.

A high strength stabilised chlorine that leaves no residue and uses Sodium Tetraborate to enhance water quality.

Acidic pH 2 - 3

Application

20 g per 10,000 litres per day. Product must be added via the skimmer box with pump running. DO NOT add directly to the pool.

Available sizes

2kg, Reece Code: 1537275
10kg, Reece Code: 1537277

SHOCK TREATMENTS

Shock treatments are essential to rapidly restoring water quality.

IQ Shock Treatments act fast to eliminate organic waste, reduce chloramines, boost sanitiser performance and return water to a clean, swimmable state.

KEY BENEFITS

- Fast-acting oxidation to help restore water quality
- Helps reduce organic waste, chloramines and unwanted odours
- Chlorine and non-chlorine options available to suit different pool systems
- Professional-grade treatments for both routine maintenance and urgent recovery situations

IQ Shock & Swim

For crystal clear water with added clarifier

Formulation

372 g/kg available Chlorine present as Dichloroisocyanurate and 100 g/kg Sodium Tetraborate Pentahydrate also contains non-chlorine oxidiser and flocking agent Its high oxidiser, low chlorine level makes it an ideal instant shock product allowing swimmers to re-enter the water within one hour of application.

Acidic pH 4 - 5

Available sizes

1kg, Reece Codes: 1537296
2kg, Reece Codes: 1537297
10kg, Reece Codes: 1537299

IQ Shock Right Plus

Chlorine free oxidiser, ideal for reducing chloramines

Formulation

A blend of persulphates (non-chlorine oxidisers) containing 5.6% available oxygen.

Its unique blend makes it suitable for all Ionised pools giving a long term oxidising effect.

Acidic pH 2 - 3

Available sizes

1kg, Reece Code: 1537301
2kg, Reece Code: 1537302
10kg, Reece Code: 1537304

IQ Pool Solutions C-5 Chlorine Dioxide Precursor Tablets

APVMA approved for commercial control of bacteria and protozoa including Cryptosporidium spp, and biofilm in swimming pools. Aids in removal of Oocysts and Chloramines.

Formulation

100 g/kg Chlorine Dioxide present, 200 g/kg Sodium Chlorite

Added benefit of shorter “down time” for pools being treated as there is no need for chlorine reduction after use.

Available sizes

10 tablets (2kg bucket), Reece Code: 1537396

100 tablets (10kg bucket), Reece Code: 1537397

*Please note: dosage rates change depending on desired outcome and current water quality. Replenish as required. Application rates indicated are to be used as a guide only.

ADJUSTERS & BALANCERS

Balanced water is the foundation of a healthy pool.

IQ Pool Adjusters & Balancers allow precise control of pH, alkalinity, calcium hardness and stabilisation, helping protect equipment, surfaces, swimmer comfort and sanitiser effectiveness.

KEY BENEFITS

- Supports accurate control of pH, total alkalinity, calcium hardness and stabiliser levels
- Helps protect pool surfaces, heaters, pumps, filters, chlorinators and metal fittings
- Keeps water balanced and less irritating to skin and eyes
- Helps chlorine and other sanitisers perform more efficiently

IQ pH Down

Decreases pH and total alkalinity in swimming pool water

Formulation

Sodium Bisulphate, Dry Acid

Application: Application rate will depend on the pH and Total Alkalinity level. To lower Alkalinity add 15g of pH Down per 10,000ltrs to a singular location in pool and dissolve.

Available sizes

2kg, Reece Code: 1547287
25kg: Reece Code: 1537309

IQ pH Up

Rapidly increases pool water pH

Formulation

Sodium Carbonate, Soda Ash

Application per 10,000ltrs

pH less than 6.8: add 100g

pH 6.8-7.0: add 80g

pH 7.0-7.2 add 40g

Mix in bucket of water prior to use as per label instructions. Allow pump to run for 3 hours prior to re-testing. Application rates to be used as a guide only.

Available sizes

2kg, Reece Code: 1537310
25kg, Reece Code: 1537311

IQ Alkalinity Up

Increases Alkalinity to prevent extreme shifts in pH

Formulation

Sodium Bicarbonate (Buffer)

Application

200g will raise Total Alkalinity by 10ppm in 10,000ltrs

Mix in bucket of water prior to application and distribute evenly across surface. Pour in single location instead, to raise pH levels more

Allow pump to run for 4 hours prior to re-testing

Application rates are to be used as a guide only

Available sizes

2kg, Reece Code: 1537313
4kg, Reece Code: 1537314
10kg, Reece Code: 1537315
25kg, Reece Code: 1537317

*Please note: dosage rates change depending on desired outcome and current water quality. Replenish as required. Application rates indicated are to be used as a guide only.

ADJUSTERS & BALANCERS

IQ Water Hardener

Increases Calcium Hardness in pools and spas

Material

Calcium Chloride

Application

Add 100g of Water Hardener per 10,000 litres to raise Calcium Hardness by 10ppm.

Dissolve in a bucket of water adding 2kg of water hardener to 5 litres of water. If more than 6kg per 50,000ltrs is needed, dose separately and apply at least 12 hours apart.

Application dosage rates are to be used as a guide only.

Available sizes

2kg, Reece Code: 1537319
4kg, Reece Code: 1537320
10kg, Reece Code: 1537321
25kg, Reece Code: 1537322

IQ Sunblock Tabs

Protects chlorine from UV degradation

Formulation

Each 500 g tablet containing 99.6% Cyanuric Acid

Maintenance Application

Add one 500g tablet per 50,000 litres to raise CYA by 10ppm

Do not exceed 50ppm

Place tablet in skimmer and allow to dissolve (May take 24-36hrs to completely dissolve)

Application rates to be used as a guide only

Available sizes

2kg (4 × 500g tablets),
Reece Code: 17963

IQ Sunblock

Protects chlorine from UV degradation

Formulation

996 g/kg Cyanuric Acid, Stabiliser

Application

Add 100g per 10,000ltrs to raise CYA by 10ppm

Pool may go cloudy for short period after adding but will clear after 8 hours.

Sunblock can be added directly to the pool then brushed to dissolve, dissolved in bucket of water then added to pool or slowly added directly to skimmer box (if multi-cyclone pre-filter is not present)

Do not exceed 50ppm. Do not use in Indoor Pools

Cyanuric Acid may take 24-36hrs to dissolve completely

Application rates to be used as a guide only

Available sizes

1kg, Reece Code: 1537323
2kg, Reece Code: 1537324
25kg, Reece Code: 1537326

*Please note: dosage rates change depending on desired outcome and current water quality. Replenish as required. Application rates indicated are to be used as a guide only.

ALGAECIDE SOLUTIONS

Algae control requires targeted solutions.

IQ Algaecides are formulated to prevent, control and eliminate common algae types, delivering reliable results across residential, commercial and high-demand pool environments.

KEY BENEFITS

- Targeted formulas for green, mustard, black spot and other common algae problems
- Preventative and treatment options available for routine maintenance
- Helps reduce recurring algae issues by improving long-term water quality
- Metal-free and copper-based options available to suit different pool surfaces

IQ Black Spot Concentrated Granular Algaecide

For removal of black spot algae in Pebblecrete, White Plaster and Tiled Pools (do not use on any artificially coloured surface)

Formulation

900g/kg available Chlorine present as Trichloroisocyanuric Acid

Application

Granules are slow dissolving and can be directed to affected areas - see package for further details.

Available sizes

1kg, Reece Code: 1537350

IQ Pool Solutions Algae Eliminator

Controls algae in swimming pools

Formulation

400 g/ltr Benzalkonium Chloride

Not compatible with Hydrogen Peroxide - Biguanide systems

Application per 10,000ltrs

90ml per 10,000ltrs for visible algae growth

60ml per 10,000ltrs for maintenance/prevention dose

Water may foam immediately after adding but will clear quickly

Available sizes

1L, Reece Code: 1537353
20L, Reece Code: 1537354

IQ Pool Solutions Maintenance Algaecide

Long-lasting prevention of algae in swimming pools for up to 6 months (do not use with ionised systems)

Formulation

32g/ltr Copper (Cu) as Cupric Sulphate Pentahydrate

Application

200ml per 10,000 litres

Available sizes

1L, Reece Code: 1537355
20L, Reece Code: 1537356

*Please note: dosage rates change depending on desired outcome and current water quality. Replenish as required. Application rates indicated are to be used as a guide only.

ALGAECIDE SOLUTIONS

IQ Pool Solutions Metal Free Algaecide

Controls bacteria, viruses, protozoa, green and mustard algae

Material / formulation

300g/ltr Poly [Oxyethylene (Dimethyliminio) Ethylene (Dimethyliminio) Ethylene dichloride]
35g/ltr Simazine

Compatible with all sanitising systems

Non-foaming

Dual action algaecide providing upfront treatment as well as long-lasting preventative action

Application

Heavy growth: 180ml per 10,000ltrs

Prevention/Maintenance: 60ml per 10,000ltrs weekly

Available sizes

1L, Reece Code: 1537357
20L, Reece Code: 1537358

IQ Pool Solutions Black Spot Treatment & Winteriser

High strength algaecide designed for removal of the most stubborn blackspot algae and long-lasting winter protection (do not use with ionised systems)

Material / formulation

120g/ltr Copper (CU) as Cupric Ammonium Complex

Application

80ml per 10,000 litres

Available sizes

1L, Reece Code: 1537365
20L, Reece Code: 1537366

IQ Pool Solutions Polymax

Metal free concentrated algaecide compatible with all sanitisers and aids clarification. Kills blackspot, green, mustard and blue-green algae.

Formulation

685g/ltr Polymeric Quaternary Ammonium Compound

Application

Heavy growth: 150ml per 10,000ltrs

Prevention: 40ml per 10,000ltrs weekly

Available sizes

1L, Reece Code: 1537359
20L, Reece Code: 1537360

IQ Pool Solutions Tropical Strength Algaecide

Controls resistant algae strains, compatible with most sanitation systems (do not use with ionised systems)

Material / formulation

50g/ltr Copper (Cu) present as a complex blend of copper salts, 150g/ltr Benzalkonium Chloride

Application

200ml per 10,000ltrs

Available sizes

1L, Reece Code: 1537361
20L, Reece Code: 1537362

*Please note: dosage rates change depending on desired outcome and current water quality. Replenish as required. Application rates indicated are to be used as a guide only.

CLARIFIER SOLUTIONS

High quality clarifiers enhance filtration.

IQ Clarifiers bind together fine particles, oils and organic matter to make them easier to filter, enhancing water clarity and overall sanitiser efficiency.

KEY BENEFITS

- Improves water clarity by binding fine suspended particles for easier removal
- Options available for mild cloudiness through to heavily clouded pools
- Helps filters work more efficiently by capturing fine particles
- Suitable for routine maintenance and post-treatment clean-up

IQ Pool Solutions Fast Floc

Concentrated flocculent with built in accelerator to bind and drop debris to the floor for vacuuming in 6-12 hours

Formulation

Polyaluminium Chloride Complex plus Polymer

pH dependant (7.6 + for best results)

Not recommended for use with Cartridge or D.E Filters

Application

200ml per 10,000ltrs

Available sizes

1L, Reece Code: 1537372
20L, Reece Code: 1537373

IQ Pool Solutions Super Clear

Heavy-duty, fast acting coagulant, not pH dependant, regular use will reduce chlorine demand, can be used as a metal-free floc

Formulation

Cationic Poly Electrolyte

Application

Clarifier/Maintenance dose:
40ml per 10,000ltrs.
Cloudy pools:
60ml per 10,000ltrs

Available sizes

1L, Reece Code: 1537370
20L, Reece Code: 1537371

*Please note: dosage rates change depending on desired outcome and current water quality. Replenish as required. Application rates indicated are to be used as a guide only.

CLARIFIER SOLUTIONS

IQ Pool Solutions Pool Shimmer

Coagulates oils, body fats and metals to enhance “sparkle” and aid in scum line prevention

Formulation

Polychite (non toxic, biodegradable)

Application

Maintenance: 85ml per 10,000 litres

Newly filled pools: 170ml per 10,000 litres

Available sizes

1L, Reece Code: 1537376

20L, Reece Code: 1537377

IQ Pool Floc

Clears cloudy pools

Material / formulation

Aluminium Sulphate (Granular / Powder)

pH dependant (raise to 8.2 for best results)

Application

400g per 10,000 litres - dissolve in bucket of water, then add to pool.

Available sizes

2kg, Reece Code: 1537330
25kg, Reece Code: 1537331

IQ Maxi Clear Skimmer Tablets

Fast acting clarifier, ideal for sand filters

Formulation

Aluminium Sulphate tablets

pH dependant (7.2-7.6 for best results)

Application

1 sock (5 tablets) per 50,000 litres

Available sizes

125g, Reece Code: 1539841
10kg: Reece Code: 1537398

*Please note: dosage rates change depending on desired outcome and current water quality. Replenish as required. Application rates indicated are to be used as a guide only.

MAINTENANCE SOLUTIONS

Ongoing care protects your pool investment.

IQ Maintenance Solutions simplify routine upkeep while helping prevent and treat common water quality issues before they become larger service problems.

KEY BENEFITS

- Practical solutions for common maintenance issues including phosphates, scale, dirty filters, salt cell build-up and scum lines
- Helps support clearer water by reducing contaminants
- Protects salt chlorinators, filters, pool surfaces and equipment

IQ Pool Solutions Nil Phos

Rapid removal of phosphates. Water may initially become cloudy as phosphates drop out, then will clear

Formulation

200g/ltr Lanthanum Chloride

Application

Application: Maintenance: 500ml per 50,000ltrs. High Phosphates (>1.0ppm/1000ppb): 1ltr per 50,000ltrs

Recommendation

Use with IQ Maxi Clear Tablets or Pool Solutions Super Clear to accelerate clarification

Available sizes:

1L, Reece Code: 1537367
2.5L, Reece Code: 1537368
20L, Reece Code: 1537369

IQ Pool Solutions Nil Phos Plus

Concentrated phosphate remover and clarifier for rapid removal of high levels of phosphates and reducing cloudiness caused by phosphate remover

Formulation

250g/ltr Lanthanum Chloride, Chitosan

Application

Phosphate levels up to 2.0ppm: 100ml per 10,000ltrs.

Phosphate levels up to 6ppm: 200ml per 10,000ltrs

Available sizes

1L, Reece Code: 1541880
2.5L, Reece Code: 3612048
20L, Reece Code: 3612049

*Please note: dosage rates change depending on desired outcome and current water quality. Replenish as required. Application rates indicated are to be used as a guide only.

MAINTENANCE SOLUTIONS

IQ Pool Solutions Duck Away

Deters ducks by changing the surface tension of water

Formulation

100 g/L Benzalkonium Chloride, 23.5 g/L Alcohol Ethoxylate

Application

1ltr per 10,000ltrs

Available sizes

5L, Reece Code: 17919
20L, Reece Code: 17918

IQ Pool Solutions Stop Cal

Assists in preventing calcium scale and reduces scale on salt cells. Ideal for “reactive” pool surfaces such as: Quartzon, Beadcrete, Pebblecrete etc

Formulation

Acrylic Polymer Complex

Application

Add 5 litres per 50,000 litres of pool water every 6 months

Available sizes

5L, Reece Code: 1537393

IQ Pool Solutions Cell Clean

Fast acting salt chlorinator cell cleaner

Formulation

Phosphoric Acid and Organic Surfactants

Reusable up to 4 times

Available sizes

5L, Reece Code: 1537380

IQ Pool Solutions Natural Filter Cleaner & Degreaser

Removes oils and fats from cartridge, media and DE filters

Formulation

100% natural ingredients; eco friendly, non toxic, biodegradable

Available sizes

750ml spray-on,
Reece Code: 1539840
1L, Reece Code: 1537382
20L, Reece Code: 1537383

IQ Pool Solutions Tile and Vinyl Cleaner

Suitable for use with swimming pools, spas, showers, tiles and vinyl. Can be used on any surface type, ideal for the removal of scum lines and stains on tiles and vinyl surfaces.

Formulation

Alkaline salts and Butyl icinol

Available sizes

750ml spray-on,
Reece Code: 1537384

*Please note: dosage rates change depending on desired outcome and current water quality. Replenish as required. Application rates indicated are to be used as a guide only.

STAIN SOLUTIONS

Stain Solutions target metal and organic staining to help restore pool surfaces and prevent long-term damage.

The range assists with the removal of coloured metal stains while helping manage metals in solution to reduce the risk of staining returning.

KEY BENEFITS

- Targets metal staining caused by copper, iron, manganese and other dissolved metals
- Helps improve the appearance of stained pool surfaces and restore a cleaner finish
- Assists in preventing stain reoccurrence by helping manage metals in solution
- Useful for pools affected by tank water, bore water, metal fixtures, salt, copper-based products or ageing surfaces

IQ Pool Solutions Stain Remover

For the removal of coloured metal stains from swimming pools

Formulation

995 g/kg Organic Acid Complex

Application

Application: 1kg per 50,000ltrs

For best results reduce chlorine levels to 0 and lower pH to 7.2 before adding Stain Remover

Recommendation: In cases of metal stains, test water for metals in solution and if present use IQ Metal Magnet to prevent further staining.

Available sizes:

1kg, Reece Code: 1537388

IQ Pool Solutions Metal Magnet

Prevents metal staining and scale

Formulation

360g/ltr Phosphoric Acid

Recommendation

Use with IQ Pool Shimmer to remove in-solution metals

Application

500ml per 50,000ltrs

Available sizes

1L, Reece Code: 1537389
20L, Reece Code: 17934

*Please note: dosage rates change depending on desired outcome and current water quality. Replenish as required. Application rates indicated are to be used as a guide only.

SPA SOLUTIONS

Spa Solutions control algae and bacteria in spas and hot tubs.

Higher temperatures, smaller water volumes and heavier bather loads mean spa water can become unbalanced quickly, making reliable sanitation and maintenance essential.

KEY BENEFITS

- Formulated for higher temperatures and heavier bather loads
- Includes bromine, chlorine and shock treatment options for flexible sanitation
- Helps control bacteria, algae, organic waste, foam, biofilm and cloudy water
- Supports balanced water to help protect spa surfaces, pipework, pumps, heaters and cartridges

IQ Spa Solutions Brom Tablets

Controls algae and bacteria in spas, pools, and hot tubs. Ideal for water temperatures greater than 26 degrees Celsius

Not pH dependant

Material / formulation

650g/kg available Bromine, 280g/kg available Chlorine present as Bromochlorodimethylhydantoin

pH value

4.0-5.0

Application

1 x 15g tablet per 1,000ltrs

Available sizes

1kg, Reece Code: 1537332
10kg, Reece Code: 1537334
25kg, Reece Code: 17956

IQ Spa Solutions Chlorine Neutraliser

Lowers chlorine and bromine levels

Formulation

985g/kg Sodium Thiosulphate

Does not reduce combined chlorine

Do not overdose (chemical will stay present in water until used, making residual chlorine level harder to achieve)

Available sizes

1kg, Reece Code: 1547288

*Please note: dosage rates change depending on desired outcome and current water quality. Replenish as required. Application rates indicated are to be used as a guide only.

SPA SOLUTIONS

IQ Spa Solutions Spa Bath & Cartridge Clean

Cleans spa pipe systems and filter cartridges

Formulation

Alkaline Salts, 28g/kg available Chlorine present as Sodium Dichloroisocyanurate

Application

Use before emptying spa or bath using dosage rates on pack. Filter cartridges may be soaked overnight in a bucket of water containing Spa Bath and Cartridge Cleaner - hose off cartridge before re-installing.

Available sizes

1kg, Reece Code: 17953

IQ Spa Solutions Flat n Foam

Suppresses foam and improves water appearance

Formulation

Dimethylpolysiloxanes

Application

Apply 1-3 capfuls directly onto foaming areas.

Available sizes

1L, Reece Code: 1537344

IQ Spa Solutions BioFresh Tablets

Prevents and eliminates biofilm in spa pipes and equipment

Formulation

Sodium Chlorite (chlorine dioxide precursor) and Inorganic Salts

Application

1 tablet added to the skimmer once per month or with 1 tablet every 2 weeks for spas that are frequently used

Available sizes

4 × 20g tablets (pack), Reece Code: 17914

4 x 100g (pack), Reece Code: 1539843

*Please note: dosage rates change depending on desired outcome and current water quality. Replenish as required. Application rates indicated are to be used as a guide only.

DRINKING WATER TREATMENT

Safe water matters beyond the pool.

IQ Drinking Water Treatment provides a simple solution for treating stored water in tanks, boats, caravans and water features, helping make water safer and more suitable for use when mains water is not available.

KEY BENEFITS

- Helps treat stored water for use in tanks, boats, caravans and other non-mains
- Tablet format offers simple dosing, convenient storage and easy transport
- Suitable for domestic, recreational, rural and mobile water treatment needs

Bio Pure Water Treatment Tablets

Treats water to make it drinkable within 12 hours

Applications

1 x 1g tablet per 200ltrs

Available sizes

12 × 1g tablets, Reece Code: 1539844

*Please note: dosage rates change depending on desired outcome and current water quality. Replenish as required. Application rates indicated are to be used as a guide only.
