**Specialists in design
and production of
water, gas and heating
installation systems
around the world.**

More than **40 core
innovations** in garden,
water and gas market
segments.

Unsurpassed quality

International presence

41 patents in 5
decades of innovation

End-to-end
production control

Arco, a **world-renowned specialist** in designing and manufacturing control and regulation systems for plumbing, gas and heating installations.

While preserving the values of the family business, the company is internationally renowned for its innovation capacity, the high quality of its products and the reliability of all its processes.

OUR VALUES:

- Responsibility
- Trust
- Commitment to one's word
- Pursuit of mutual benefit
- Proximity
- Respect for people and environment

- Testing
- Design
- Productivity analysis
- Prototyping

We have our own in-house RD research centre where we develop unique solutions.

ARCO has actively contributed to the progress of the plumbing industry around the world, thanks to its spirit of constant innovation and its desire to efficiently and simply solve the needs and demands of installers and users alike.

Our **quality standard** gains the trust of professionals: 8 out of 10 installers choose us.

We apply the total quality concept when designing and manufacturing our products, in order to guarantee a level of performance that exceeds the regulatory requirements in force in the most demanding markets.

All our products are manufactured with the best certified raw materials and undergo continuous leak testing to guarantee zero leakage under normal conditions of use.

Products designed to improve efficiency and life quality for people and our planet.

We are committed to sustainability and the circular economy, which is why we design and manufacture products whose main objective is to improve the efficiency and overall performance of installations while safeguarding people's health. To this end, we develop specific initiatives aligned with the SDGs (Sustainable Development Goals) such as:

- **Developing nickel-free and low-lead** products to improve water safety.
- **Minimising the impact of our activity** by reducing water consumption in manufacturing processes.
- **Using recycled and recyclable materials** in the packaging of our products.
- **Extending the life cycle of our products**, with greater durability and resistance over time as for example the patented VITAQ range.

ALIGNMENT WITH OBJECTIVES:

The real engine: a team of more than 500 professionals that are highly-qualified and committed.

ARCO is a professional family business with professional specialists in each of its disciplines, from design to after-sales and customer service.

We are certified as a Family Responsible Company (FRC), which recognises our commitment to work-life balance and equal opportunities as key elements of our corporate culture.

Arco is present in +90 countries

**+1.000
million**
valves installed
across the world

**34
million**
pieces sold every year

**+300
million**
A-80 valves sold
in the world

2 Arco owned
manufacturing
plants (in Spain and
Tunisia)

4 logistics centres
(Peninsula (Valencia),
Canary Islands, Poland,
France and Tunisia)

+90
commercial
presence in more
than 90 countries

4 commercial
offices (in Spain,
France, Poland,
Hungary, Morocco
and Tunisia)

We boost the talent of our youngsters.

ARCO sponsors the Polytechnic University of Valencia competition team, comprising young people from the ARCO- MotoR University Team, engineering students from different degrees, who compete in the WorldSBK World Championship in the ssp300 category and in the Spanish Championship in ESBK Junior and in the university MotoStudent championship alike.

VITAQ SYSTEM

A system created to solve problems of limescale in installations.

Válvulas ARCO, S.L. has developed and launches an anti-limescale system for angle and ball valves.

The **VITAQ system** offers more guarantees to your **installation**, protecting your valve from limescale build-up and **extending its service life**.

WHY VITAQ SYSTEM?

- 1. VITA** means **LIFE** in Latin.
- This highlights its main quality: **TO PROVIDE LIFE**.
- The letter **"Q"** stands worldwide for **QUALITY**, our key corporate value.
- It is a **SYSTEM** in itself due to its engineering and functional contribution.
- Longer product lifespan.

VITAQ
SYSTEM

VITAQ System

ARCO develops and brings to market an anti-calcium system for angle and ball valves. The **VITAQ System** has great advantages over normal fittings for any installation, **protecting valves from limescale, thus extending their useful life.**

The patented **VITAQ®** System, the **one-piece stem-ball is made from a special polymer.** Even with the added benefits, The VITAQ system still maintains the same strength properties as the brass design. This design increases resistance, facilitates smooth operation and most importantly, prevents limescale from forming.

- Suitable for drinking water.
- Ecological, high-tech materials for longer life.
- Keeps water flow constant over time.
- 100% recyclable and non-toxic.

Hard water in New Zeland

Types of water	mg/l	° TH
Soft	< 17	< 1,7
Slightly hard	< 60	< 6,0
Moderately hard	< 120	< 12,0
Hard	< 180	< 18,0
Very hard	< 250	< 25,0
Extremely hard	> 250	> 25,0

European standards for drinking water:
Max. 50°F.

Limescale builds up in pipes, taps, fittings, and sanitary ware, and it can eventually block them completely. It causes damage to electrical appliances, heating elements and obstructs water pumps. Sometimes the whole installation needs to be removed.

SIGNS THAT WATER CONTAINS CALCIUM:

- Decreased water flow through faucets.
- Filters filled with small stones.
- Lower power of water heaters.
- Lime on heating elements affects energy consumption up to 64% more.
- Dishwashers affected by limescale require more detergent.

Arco Giro Mini Stop

Ensures an installation with the valve outlet in the desired position.

ARCO LIPSTICK

UNIQUE DESIGN. MAXIMUM PERFORMANCE.

ARCO LIPSTICK is the only anti-scale valve on the market that combines elegant design and maximum performance to suit the style of every bathroom.

- Easy installation.
- ¼ turn system.
- Maximum watertightness, 100% tested.
- Low pressure loss thanks to its VITAQ anti-scale system.
