EN This instruction must be given to the user.

Guarantee/Liability only when assembled by an approved specialist in accordance with the instructions and local regulations.

Please unwrap the bath and check it carefully to ensure it has not been damaged in handling or transport. Installation of damaged to defective bath will be deemed as acceptance and no claim will be accepted after installation. Ensure bath is well protected before, during and after installation.Bath must be installed to the requirements of AS/NZS 3500 by a qualified plumber and in accordance to National Construction Code.

There are various methods of installation and will depend on site condition type of bath and available access to plumbing/drainage. This installation guide does not include details of waste connection; final decision about installation of waste connection & cutout allowance in floor for connection, should be taken by a suitably qualified person.

EN General installation instructions

User manual

Protection from damage
Instructions for use
These instructions for use must be carefully read before installation.

Check on content of delivery and condition of the components
Check delivery after receipt for completeness and possibly damage (see parts list on page 3). Inform the dealer immediately when damage is apparent. We are not liable for damage arising during or after installation/fitting.

Check door width before starting work
Does the bath pass through the door of the room in which the bath will be installed? Required minimum door width: See dimensions page 2.

Lifting/moving
The bath must only be lifted/moved using the transport straps provided - never use the hoses or installation parts.

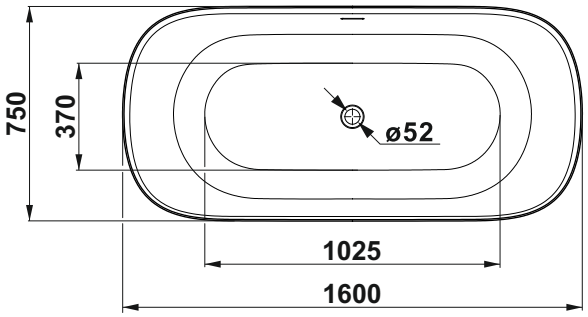

Laying circuits
Do not lay any circuits under the bath.
Use suitable protective covers to prevent damage to surfaces and blockages by dirt or dust arising during fitting. Cover sensitive components (drain) temporarily with a protective cover before starting the installation/ fitting.

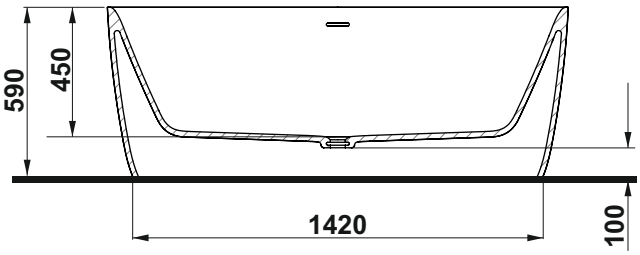

Special precautions
When cleaning the tiles, make sure that no ammonia or a similar aggressive cleaning agent come into contact with the installed parts.

Water connection through the overflow.
This connection must absolutely be effected by a qualified specialist.
After connecting the water supply and drainage pipes, the tub must be examined to ensure that it is waterproof.
Changes allowed: Laufen reserves the right to make changes or modifications on any of its products without notice.

EN General Information, Maintenance Instructions

General comments on operation and use

For your safety bathtub temperature should not exceed 40°C.

Let water out after each bath. Never leave children in the tub unsupervised.

Use
Beware!
Increased risk of slipping when surface is wet. This is particularly so when using soap, shampoo, bath oil, etc.

Maintenance instructions
The surface is simple to clean and maintain. The smooth surface hardly collects dirt. Regular care: Sponge, soft cloth, somewhat antistatic cleaning agent. The tub will thus retain its gloss and reject dirt.
To clean your massage tub, please use a soft sponge, liquid soap and water. Rub dry with a dry cloth.
Avoid the use of abrasives or solvents which damage the surface of the tub.
After long contact periods, several substances like ink, cosmetics and dyes may leave colouring stains. Lit cigarettes can leave burning rings.

These stains and spots as well as scratches or other small damages can be removed following the recommodations below:
Remove heavy dirt with liquid household cleaner e.g. dishwash detergents or liquid soap (observe dilution instructions).
Remove lime marks with a decalcifier. Always rinse with plenty of clean water. Give a final polish with a soft cloth. Use no acid cleaning agents or cleaning vinegar.
Damage
Scratched surfaces should always be treated by a specialist. Serious damages can be repaired with the maintenance kit (2.9996.5.###.000.1).
Mix filler and catalyst to a complete dispersion of liquid substance. Apply the filler on the damaged part and let it cure for at least 12 hours at minimum 15°C.
Rub the cured filler with a 220 grain glass-paper and also the part around to eliminate any non-homogeneous parts. Clean the surface as described above.
Damage resulting from inappropriate treatment by the user will not be covered by our guarantee.

EN Important safety instructions - Instructions pertaining to a risk of fire, electric shock or in jury to persons
Read and follow all instructions!

WARNING: Risk of personal injury. Do not permit children to use this unit without adult supervision.

WARNING: Risk of personal injury. Do not operate this unit without the guard over the suction fitting.

WARNING: Risk of hyperthermia and possible drowning. People using medications and/or having adverse medical history should consult a physician before using this product.

WARNING: Risk of personal injury. Do not overfill unit before entering. Entering tub when filled more than 2/3 can cause overflow and slippery conditions. Exercise caution when entering and exiting.

WARNING: No food or alcoholic beverages. Use of your bathtub immediately after meals is not recommended. Avoid alcohol consumption before or during bathing. Alcoholic beverages can cause drowsiness or hyperthermia resulting in loss of consciousness or even drowning.

WARNING: Risk of personal injury. Do not use any electronical devise as shaver, hair dryer, curling iron, ect. while taking a bath. There is a danger of being electrocuted.

WARNING: Pregnancy. If you are or think you may be pregnant, consult your physician before using the bathtub.
Never drop or insert any object into any opening.

Use this unit only for its intended use as described in this manual. Do not use any plumbing devices not recommended by American Standard.
