HIDDEN BEAUTY

Geberit Concealed Cistern Technology

Driven by design freedom

Bringing a new level of design freedom to Australian bathrooms, Geberit's concealed cistern technology combines aesthetic beauty with reliability and water efficiency.

Having pioneered concealed cistern products in Switzerland for 60 years, Geberit continues to drive the market forward with its innovative button and cistern combinations. Whether you're seeking to maximise bathroom space or achieve the clean lines of a striking wall hung pan, Geberit makes it possible. Geberit's unrivalled design flexibility is reshaping the bathroom in new and exciting ways.

Engineered with Swiss precision

Focused on achieving the highest levels of quality, Geberit manufactures its cisterns in Germany and its flush buttons in Switzerland.

Geberit's vision is to create more sustainable products that improve people's well-being. This philosophy has led to more than 70 million Geberit concealed cisterns installed worldwide. Now you can experience the innovation and precision that Geberit is famous for.

World leading design

Working in partnership with leading global designers, Geberit's extensive choice of button designs and finishes offer high quality design options for every type of bathroom.

The Sigma50, Sigma01 and Omega20 buttons were designed by Christoph Behling and his team. Working with leading global brands including Tag Heuer, they create fresh and inspiring products that enhance the way people live.

“We have designed these buttons with love and patience to produce a high quality product that cannot be found in mass-produced items.”

Christoph Behling
Designer for TAG Heuer & Geberit

DESIGN
MEETS
FUNCTION

A feeling of freshness

A sense of freshness starts as soon as you approach the toilet via a proximity sensor. The air is extracted directly from the toilet pan and returned to the room once it has been purified.

Toilet not available in Australia.

Geberit DuoFresh

The Geberit DuoFresh Odour Extraction unit is integrated directly into the toilet cistern and extracts unpleasant odours straight from the source. Once the air has been purified by a ceramic honeycomb filter, the unit releases it back into the room without any odours. The technology and filter are hidden behind the button and feature a downward facing orientation light that shows the way to the toilet at night.

-  Direct odour extraction
-  Ceramic filter
-  Hygienic
-  Whisper quiet
-  Day / night detection

DuoFresh Odour Extraction System 1804981

Ensure optimal performance by replacing the filter yearly and the sticks fortnightly.

The sticks provide the blue colouring and foaming of the toilet water to enhance bowl cleanliness.

Annual Servicing Kit 1804984

Compatible with Sigma01 and Sigma50 buttons and all Sigma8 cisterns.

Air is extracted directly from the toilet pan via the flush pipe and flush valve and purified in the integrated ceramic honeycomb filter.

Phone control with Geberit Home App

Controlling settings for the Geberit DuoFresh odour extraction unit is easy – it's right there in your hands with the Geberit Home App.

Sigma

Sigma's extensive range of buttons offers design freedom at the front of the wall. Suitable for traditional in-wall installations, the range is simple to install based on standard Australian construction practices. Sigma allows for uninterrupted wall and floor tiling. This highly desired look achieves clean lines and the appearance of additional space.

-  Auto Flush
-  5x LED Colour Settings
Always On/Always Off
-  Cleaning Mode

Touchless dual-flush Reflective glass 1836003 

Sigma80 represents the forefront of modern design. A minimalist glass finish hides the advanced technology that allows for touchless flush activation. A full or half-flush is achieved with the wave of a hand. Choose ambient setting for the LED light bar and you can light the way to the bathroom at night. Plus, the LED can be set to always on or always off. Activated by sensor movement, a convenient auto-flush function can also be selected.

Adjust your Sigma80 settings with the Geberit Control App:

Sigma70

The designer touch

Brass
1836028

Characterised by its minimalist, floating design and the highest aesthetic standards, the Sigma70 range is available in a variety of architectural colours and materials. The two buttons are precisely coordinated for a homogenous panel surface that looks like it has been made from a single piece.

reddot winner 2023

Toilet not available in Australia.

Sigma50

Subtle curves

Concrete Look Plate
Chrome Button
1836017

With its slimline buttons and subtle curves, the Sigma50 draws the eye to give the impression of depth. The Sigma50's modern metallic finishes including timeless chrome, red gold, brass and dramatic black. Also available in concrete-look solid surface materials and black walnut to suit individual bathroom styles.

Position perfect

Chrome
1811563

Brushed S/Steel Metal
1811565

Geberit's choice of Sigma remote buttons can be installed up to two metres from the concealed cistern mounted in-wall, in-ceiling or in-duct. This freedom opens up a range of positioning options such as locating the button to the left or right. A choice of compact round and square buttons offer space saving design with convenient dual-flush functionality.

reddot award 2015
winner

Omega

If space is at a premium, Omega button and concealed cistern combinations provide a range of installation options for under counter or low height installations. This allows for the cistern to be installed in a hob, under a window or within a custom vanity.

The button can be located for top or front press, providing additional versatility.

■ GEBERIT

Omega20

Understated elegance

Matt White, White
1836033

The Omega20 button range combines compact dimensions with simple, geometric shapes to achieve understated elegance in the bathroom. The circular buttons act as a visual symbol for flushing volumes - a perfect blend of design and function. The tone-in-tone finish is perfectly suited to the interior design trends for elegant monochromatic palettes with bold colour statements. The satin finish also features an Easy-to-clean coating that is fingerprint resistant and easy to wipe down to keep the bathroom hygienic.

The Omega Undercounter cistern with frame is designed for mounting your wall hung pan and fits within 140mm internal wall cavity for front press and 180mm for top press.

Omega Undercounter Cistern

Back to wall

The Omega Undercounter cistern back to wall is designed for floor mounted pans and fits within 140mm internal wall cavity for front press and 180mm for top press.

Types of Access

Geberit concealed cisterns are designed to maximise useable space in the bathroom. They are modern and provide a cleaner look by hiding the cistern in wall. For 60 years, Geberit cisterns have been installed around the world – delivering proven reliability and excellent hygiene.

Sigma in-wall cisterns can be installed – back to wall or wall hung in the bathroom. Omega cisterns are intended for low height applications including under-counter or in a vanity/hob and allow the freedom of choice with back to wall or wall hung pans. For more challenging bathroom applications, Geberit Remote concealed cisterns can be installed in-ceiling, in-wall or in-duct configurations.

Standard wall height

Remote in-ceiling wall hung mounted

Cistern cannot be serviced via remote buttons.

Remotes left or right compatible

Sigma Button Range

Options with Sigma concealed cisterns.

When choosing a Sigma cistern and button combination, you need to establish what type of access the cistern will have. This can be in-wall with back to wall or wall hung cistern. Knowing this will help to guide your product selection. First, choose a button type that works with your service access. Second, establish if you're using a back to wall or wall hung pan. Then choose the Sigma cistern that works with your choice of pan.
