

THE SMARTER INSTALL

Give your customers more control over their hot water, energy use, and power bill with our new app-enhanced electric range.

THERMANN
SMART ELECTRIC

WHAT MAKES IT SO SMART?

With built in wi-fi and the easy-to-use **Thermann Control App**, your customers can now:

- ▶ View energy use and power cost.
- ▶ Program the water heater to operate more efficiently. For example, when PV solar is available or power tariffs are lowest.
- ▶ Lower tank temperature to maximise savings, while keeping anti-legionella cycle.
- ▶ Remotely turn the water heater on or off before holidays or when the house is vacant.
- ▶ Machine learning can analyse usage patterns and personalise the heating cycle to reduce energy use by keeping heating to a minimum.

The units element size ranges from 1.8 – 3kW.

WHY WILL YOUR CUSTOMERS LOVE IT?

The ultimate benefit of the units' smart features is their ability to reduce power use, and because of that, save your customers money. For customers with PV solar, common scenarios could see them saving up to \$1,000 per year. And for those with a TOU tariff system, common scenario could see them saving up to \$600 per year.

WHY WILL YOU LOVE IT?

Our new app-enhanced electric range has the same footprint, dimensions, and connection points as our other electric units, so it's easy for you to install. Plus, it can be installed with a restricted electrical license (just like our other electric units) so you don't need an electrician for your install.
