

Fibron & Carbon JUMBO filter cartridge

Large diameter BWT Carbon filter cartridges are designed for high flow rate and high sediment load applications. 2 style of cartridges are available: Premium Fibron cartridges combine activated carbon and a moulded fibre matrix for low pressure drop, maximum performance and capacity. Standard carbon block cartridges have an extruded block and offer good value performance. All these Carbon cartridges reduce chlorine, organic matter and taste & odour from potable water. Manufactured for potable water applications these cartridges combine quality and cost effectiveness to provide excellent filtration value.

Specifications

- Micron rating: 5, 10 micron (nominal)
- Materials of construction: Activated carbon and Polyolefin fibres
- Length: 254mm or 508mm
- Width: 114mm
- Maximum operating temperature: 40°C
- Flow rate: < 30lpm 1 high | < 50lpm 2 high
- Not for use in water that is microbiologically unsafe or of unknown quality without adequate disinfection

Application

- Domestic Whole House System
- Commercial high flow
- Light industrial
- Chemical - check compatibility
- Prefiltration
- Sea water

Features & Benefits

- Food grade activated carbon to reduce chlorine, organic matter and taste/odour
- Effective particle removal efficiency
- Individually wrapped, sealed and labelled
- Competitive value product
