Commercial Collection

Shaped For Every Bathroom

Over 20 years, Mizu has forged a reputation for creating beautiful, high-quality bathroom fittings. Our promise of 'Shaped For Every Bathroom' means no matter what your project entails, we can help you create a space that delivers dignity and improves functionality without compromising on style.

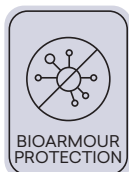

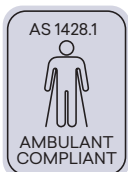

The Commercial Collection brings a new level of convenience and style to all Australians, no matter how unique their needs are. Every product in the collection has been designed locally to the highest commercial standards. With Mizu, there are no limits in creating stunning bathrooms that give people increased independence.

The Mizu Commercial Collection is a comprehensive selection of products that combine domestic comfort with robust, long-life performance. Thoughtful functionality and enhanced mobility are at the heart of our design philosophy. This unique collection opens up a world of possibility for elevating accessible spaces, while positively impacting the lives of end users.

The versatile choice

This extensive collection is built to perform across many applications including hospitals & healthcare, aged care, residential, education, sporting & leisure, public spaces and hospitality.

Setting the standard

We've applied the latest hygiene technologies to create a range that delivers high-end aesthetics and enhanced accessibility for a variety of users – all manufactured to the highest standards.

Ready when you are

Supplied and supported through the Reece network, the Mizu collection is locally stocked for projects of any size and configuration – backed by market leading commercial warranties.

BioArmour™

Mizu Antimicrobial Technology

Mizu Drift Compliant Grab Rails feature BioArmour™ technology in the flange and all connection points. This innovative seal that firms to the rail, providing superior protection against grime and other potentially harmful build up behind the rail.

BioArmour™ is an antimicrobial technology that proactively inhibits and disrupts the growth of bacteria and microbes at the molecular level. This technology makes Mizu compliant grab rails uniquely suited for hygiene-critical locations and high-traffic touch points.

BioArmour™ is an advanced antimicrobial technology that neutralises potentially harmful microorganisms such as bacteria, fungi, and mould, to prevent cross-contamination and facilitate cleaner, safer environments.

When bacteria come into contact with a BioArmour™ protected Mizu Drift Grab Rail, the antimicrobial technology prevents the bacteria from growing, producing energy, or replicating. As a result, they die.

Powerful antimicrobial action.
Clinically tested and proven to eliminate 99.9% of microbes.

Long-lasting, 24/7 protection.
Provides non-stop protection for a product's entire lifespan, without the need for maintenance or replacement.

Safe to use in any environment.
Independently tested in thousands of applications, BioArmour™ contains no nanotechnology and is non-leaching.

BioArmour™ is sourced from global trusted leaders in antimicrobial technologies. Found in thousands of applications around the world including hospitals, aged care homes, offices, public spaces, food services, and manufacturing.

BioArmour's™ formulation has been independently tested to ISO standards and meets the requirements of BPR compliance for antimicrobials. It has been shown to inhibit the growth of a range of bacteria including MRSA, VRE and Acinetobacter baumannii as well as Staph. aureus and E. coli and select viruses.

Finishing & Plating

Inspired by leading design trends, Mizu has curated a selection of colours and finishes made to perform in a high demand of commercial settings. Beautiful and durable, you can spec with confidence.

Made With Stainless Steel

Mizu Grab Rails are made from high quality 304 grade stainless steel, delivering unrivalled strength and safety.

Hard-Wearing

Highly resilient and easily repaired, stainless steel is the ideal material for fixtures that require extreme resistance to tough physical and environmental challenges.

Hygienic & Easy To Clean

The easy maintenance of stainless steel makes it the most specified material for the strictest hygiene environments such as hospitals, laboratories, processing plants and kitchens.

Environmentally Friendly

100% recyclable. Stainless steel used to manufacture Mizu Drift Compliant Grab Rails is generally made from between 65-80% refined stainless steel scrap.

Complete The Spec

Complementing the Mizu range, Reece supplies an extensive variety of commercial spec bathroom products through several leading brands. These include Wolfen, Roca and Hideaway+.

WOLFEN™

Wolfen offers innovative solutions for a wide array of commercial and industrial applications spanning health care, disability, councils, aged care, public recreation, sporting facilities and education institutions as well as commercial food premises and hospitality. Engineered to the most demanding standards, Wolfen products are made to perform.

Roca

Roca has been manufacturing sanitaryware in Spain for over 100 years. Now the global leader in ceramics, their accessible and ambulant Meridian range features toilets and basins designed to Australian standards.

hideaway+

Hideaway+ are experts in creating seamless and functional spaces with in-wall cisterns and flush buttons. The DDA Compliant Hideaway+ Thin Buttons come in 6 finishes, all perfectly matching the Mizu range. Complete your spec down to the details with Hideaway+

Exclusively sold at Reece
