Capacity Data	09
Compac Nomenclature	14

The COMPAC is a range of fully fitted packaged units featuring world leading Tecumseh Scroll compressors.

The Smooth Operator

Lightweight and easy to install, the new COMPAC Scroll delivers reliability with whisper quiet, vibration free operation.

The COMPAC is a range of fully fitted packaged units featuring world leading Tecumseh Scroll compressors. The Scroll compressor allows for an ultra smooth and efficient operation due to the true rotating motion which enables dynamic balancing. Designed with space constraints in mind, the horizontal discharge condenser configuration suits unit placement in car parks, roofs, on the side of buildings and mounted above one another without restricting airflow.

Installation is simple as every COMPAC is optioned straight out of the box. Once installed, you can relax knowing the premium compressors and large condensers will deliver reliable refrigeration when you need it most.

Every COMPAC is built with high quality, corrosion resistant components, and extensive testing is completed on each unit, to ensure long life in the field. What's more, electronic overload protects against phase loss, imbalance, reversal, locked rotor and over-current to ensure excellent compressor protection.

Featuring Tecumseh Scroll compressors

Horizontal discharge condenser configuration

Can be installed on air conditioning wall brackets

Easily accessible range of genuine spare parts

Extended copper tails suitable for press fittings.

Made for Reliability

The Compac comes fully featured and ready to install with a host of advanced features. Enjoy ease of servicing and long-life performance every time.

Small footprint. Housing is designed to optimise spacing

Large epoxy finned condenser

Oil separator on every model

Suction accumulator on all models

Powder coated galvanized steel casing

Light weight design

Easy servicing - mechanical & electrical components in same compartment

Factory leak tested

Electrical panel is fully wired to all electrical components

Separate compressor and fan compartment for safe and easy maintenance

Safety controls offering substantial protection
