

■ GEBERIT

HIDDEN BEAUTY

Geberit Concealed Cistern Technology

Driven by design freedom

Bringing a new level of design freedom to New Zealand bathrooms, Geberit's concealed cistern technology combines aesthetic beauty with reliability and water efficiency.

Having pioneered concealed cistern products in Switzerland for more than 50 years, Geberit continues to drive the market forward with its innovative button and cistern combinations. Whether you're seeking to maximise bathroom space or achieve the clean lines of a striking wall hung pan, Geberit makes it possible. Geberit's unrivaled design flexibility is reshaping the bathroom in new and exciting ways.

Engineered with Swiss precision

Focused on achieving the highest levels of quality, Geberit manufactures its cisterns in Germany and its flush plates in Switzerland.

Geberit's vision is to create more sustainable products that improve people's well-being. This philosophy has led to more than 70 million Geberit concealed cisterns installed worldwide. Now you can experience the innovation and precision that Geberit is famous for.

World leading design

Working in partnership with leading global designers, Geberit's extensive choice of button designs and finishes offer high quality design options for every type of bathroom.

The Sigma50, Sigma01, Omega60 and Omega20 buttons were designed by Christoph Behling and his team. Working with leading global brands including Tag Heuer, they create fresh and inspiring products that enhance the way people live.

"We have designed these buttons
with love and patience to produce a
high quality product that cannot be
found in mass-produced items."

Christoph Behling
Designer for TAG Heuer & Geberit

DESIGN
MEETS
FUNCTION

Sigma

Sigma's extensive range of buttons offer design freedom at the front of the wall. Suitable for traditional in-wall installations, the range is simple to install based on standard New Zealand construction practices. Sigma allows for uninterrupted wall and floor tiling. This highly desired look achieves clean lines and the appearance of additional space.

Touchless dual-flush Reflective glass
9507337

Sigma80 represents the forefront of modern design. A minimalist glass finish hides the advanced technology that allows for touchless flush activation. A full or half-flush is achieved with the wave of a hand. Choose ambient setting for the LED light bar and you can light the way to the bathroom at night. Plus, the LED can be set to always on or always off. Activated by sensor movement, a convenient, auto-flush function can also be selected.

Omega

If space is at a premium, Omega button and concealed cistern combinations provide a range of installation options for under counter or low height installations. This allows for the cistern to be installed in a hob, under a window or within a custom vanity.

The button can be located for top or front press, providing additional versatility.

Vanity, mirror cabinet and shower not available in New Zealand

Omega60

Seamless finish

White
1811553

The Omega60 button sits flush to the wall surface creating a seamless, even finish for a contemporary bathroom look. This compact button design can be installed above or in front of the cistern for greater versatility.

Square
Dual-flush button

A compact, square button design that can be located away from the cistern.

DISCOVER HIDDEN BEAUTY

Types of Access

Geberit concealed cisterns are designed to maximise useable space in the bathroom. They are modern and provide a cleaner look by hiding the cistern in wall. For over 50 years, Geberit cisterns have been installed around the world – delivering proven reliability and excellent hygiene.

Sigma in-wall cisterns can be installed – back to wall or wall hung in the bathroom. Omega cisterns are intended for low height applications including under-counter or in a vanity/hob and allow the freedom of choice with back to wall or wall hung pans. For more challenging bathroom applications, Geberit Remote concealed cisterns can be installed in-ceiling, in-wall or in-duct configurations.

Standard wall height

Remote in-ceiling Wall hung mounted

Sigma Button Range

Options with Sigma concealed cisterns.

When choosing a Sigma cistern and button combination, you need to establish what type of access the cistern will have. This can be in-wall with back to wall or wall hung cistern. Knowing this will help to guide your product selection. First, choose a button type that works with your service access. Second, establish if you're using a back to wall or wall hung pan. Then choose the Sigma cistern that works with your choice of pan.

A modern bathroom interior. On the left, a white toilet is positioned against a wall with a grey, stone-like texture. Above the toilet, there is a white rectangular panel with two buttons. To the right of the toilet is a glass-enclosed shower area. The shower walls are covered in large, light-colored tiles. A showerhead is mounted on the wall, and a small bottle of soap is on a shelf inside the shower. The floor is made of large, light-colored tiles. In the background, a wall with vertical wooden slats is visible.
