Mizu Drift Shower Mixer with Diverter

IMPORTANT NOTE:

Mixer must be installed to the requirements of AS/NZS 3500 by a qualified plumber. Your mixer comes to you already factory assembled and tested. We do not recommend the dismantling of any internal part of the mixer. The mixers are factory tested and sealed so as to give the best performance.

INSTALLATION INSTRUCTIONS:

1. Flush out new pipe work prior to connecting the new mixer
2. This tap is suitable for high pressure applications where both hot and cold water supply pressures are at 150kpa or above
3. During installation, protect the exposed finish surface by using the plastic cover provided. Please pay attention to the minimum/maximum depth
4. In a typical installation, the mixer is mounted on the timber/metal noggin and secured with screws (not provided)
5. The shower mixer outlet must always face up towards the shower
6. Connect the mixer to the hot and cold water supply
7. Pressure check all connections. Leaking joints are not covered by the warranty
8. When ready for finishing, remove the plastic cover and assemble

SERVICING - REPLACEMENT OF CARTRIDGE:

1. Remove the pin lever and unscrew the grub screw
2. Lift the handle and remove the cartridge dome
3. Unscrew the diverter and remove the shower plate
4. Unscrew the lock nut and lift the cartridge
5. Replace the cartridge, lock nut and diverter
6. Check for leaks
7. Replace the dome, coverplate and handle

CLEANING RECOMMENDATIONS:

We recommend the use of soapy water or approved cleaners. This product should not be cleaned with abrasive materials. Damage caused by any improper treatment is not covered by the product warranty. Refer to Warranty Conditions
