# CREATING YOUR PERFECT SHOWER

Creative Glass offers four main shower styles. Each shower style can be further configured based on your individual bathroom requirements. Door type, glass type, frame and hinge colours are all fully customisable.

## Frame options

### FRAMELESS

Frameless Showers are loved for their clean, seamless lines. Every panel features smoothed glass edges, which help to achieve a true designer finish. With no visible frame, Frameless Showers are perfect for creating a sense of space and openness in the bathroom.

### SEMI FRAMELESS

Semi Frameless Showers are framed around the external perimeter of the shower only. All internal edges and doors are frameless. Semi Frameless showers offer a clean, contemporary look.

### SEMI FRAMED

A Semi Framed Shower is framed around the external perimeter of the shower, leaving the internal vertical edge between the fixed glass panel and the glass door frameless. Semi Framed Showers achieve a more modern, minimalistic look than a framed shower screen.

### FRAMED

Framed Showers feature a polished aluminium frame around every panel of glass. The frames can be customised in a variety of colours to complement your bathroom design. Customise your screen with a black frame to create a dramatic statement in your bathroom.

Fixed, Double Framed Panel

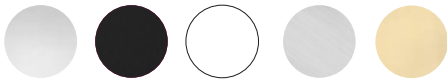

## FIXED PANEL CONFIGURATION

A Fixed Panel is a single panel glass screen that offers open, walk in access to the shower. It is ideal for creating a clean look or making smaller bathrooms appear larger.

Typical Application: when two perpendicular walls are lined with tiles or panelling.
