

NEO 1000 CENTRED WALL HUNG BASIN

NEO BASIN INSTALLATION INSTRUCTIONS

NO claims for damages / defects will be recognised after installation.

Prior to installation it is important to unpack and inspect your products to ensure no damage has occurred in transit and that the product IS CORRECT.

If damage has occurred, or a visible defect exists, do not proceed with installation and contact supplier IMMEDIATELY.

Step 1. Mark out bolt positions ensuring they are level and at the correct height.

Step 2. Installer to determine appropriate fixings, ensure wall is suitable and studs, noggins etc. are in appropriate locations.

Step 3. Once appropriate fixings are in the wall, place basin over bolts and tighten.
See figure 1.

Step 4. Once basin is attached to wall, connect trap and other hardware as necessary.

Note: Bottle trap is not included with basin

NEO 1000 CENTRED WALL HUNG BASIN

DETAILED CLEANING INSTRUCTIONS

Regular cleaning will assist to keep your solid surface looking fantastic and reduce wear and dirt build up. Spills should be cleaned promptly. Clean with a mild detergent or soapy water and a soft cloth, sponge or non scratch scourer*.

For stubborn marks start with the non-scratch scourer and a mild detergent, if required use a diluted very mild abrasive cleaner* cleaning in light circular motions.

Intense clean/repair: For extreme marks and light scratches a very light buff in circular motions using the finest grade sand/glass paper will restore the surface. A heavier grade of sandpaper will scratch the surface which can be removed by then using a light sand paper. Avoid applying excessive pressure or clean/rub the same area for a prolonged time unless repairing a scratch or damage.

*Always test 'non scratch' and 'mild abrasive' products in a non-conspicuous area first to ensure suitability as brands can differ.

Important notes: If the product is created from a combination of Solid surface and another material such as glass or Softskin, it is important that the cleaning instructions for Solid surface are not carried out on the alternate material. Damage may occur which will void your warranty.

To maintain a uniform appearance, you may need to clean the entire surface. Never use sharp products such as steel wool or aggressive, commercial grade / strong cleaners or chemicals (e.g. acetone, trichloroethylene, acids, and caustic soda) as these may damage and scratch the surface. For best results always finish by wiping surface clean of all detergents and dry with a soft clean cloth.
