Care and Maintenance

- Repairing a scratch: if any scratches occur during installation these can be removed by rubbing with a 1500+grit waterproof abrasive paper and water.
- Repolish the surface afterwards using a neutral automotive colour restorer or household metal polish. For best results limit sanding to the smallest possible area around the scratch.
- It may be possible to polish very fine scratches away without using abrasive papers: scrubbing gently with a soft brush or plastic pad (not metal scouring pad) and a mildly abrasive cream cleaner. Afterwards scrub the whole area with plenty of clean water and re-polish as before.

Everyday Cleaning

- For general cleaning use soapy water or an approved cleaner for solid surfaces.
- For a deeper periodic clean, to maintain the matte surface a 9507170 Kado Solid Surface Care Maintenance Kit is supplied.
- Damage caused by any improper treatment is not covered by the product warranty. Refer to Warranty Conditions.
