200L & 285L

**THERMANN**

# THE ULTIMATE HEAT PUMP

## DIGITAL CONNECTIVITY

**Schedule heating**  
to best utilise solar PV.

**Manual boost mode**  
for when you need  
extra hot water.

**Holiday mode**  
allows you to save  
on running-costs.

**Rescue mode** available  
to prevent from being  
without hot water.

**Receive notifications**  
for easier fault diagnosis.

**Monitor the tank's**  
temperature.

## DURABLE AND DEPENDABLE

Local manufacturing  
ensures easy access to  
support and spare parts.

Suitable for all climates  
and extreme weather  
conditions (-6 to +45).

Easy install with similar  
foot print and connections  
as a Thermann electric  
storage unit.

Storage Capacity	Ambient Temperature	Recovery Rate (L/hr)	Recovery Rate with Element Boosting (L/hr)	Household Size
200L	20 °C	53	92	
285L	20 °C	54	93
