INSTALLATION INSTRUCTIONS

Important Note

The Wolfen back rest should be properly assembled, installed and cared for. Failure to follow the below instructions may result in serious injury.

The back rest bar meets AS 1428.1-2009 and is manufactured from high quality stainless steel with a HDPE back rest. It has been tested to a loading of 1100N. Proper care must be taken to install the grab bar to an appropriate load bearing base, using appropriate fixing bolts.

Installation Instructions:

1. Confirm the contents of the box.
The box should contain 1 back rest grab bar and 6 screws.

IMPORTANT INSTALLATION NOTE:

Where there is an inwall cistern installed, take care to ensure that no screws are drilled into the concealed cistern.

2. Assemble the two legs to the stainless panel.

Ensure that the wall the back rest is to be mounted to contains sufficient timber to provide proper structural support.

- Using the mounting flange plates as a template, mark the centre of the screw hole locations and drill in the holes.

- Install the back rest with the screws provided. Inspect each screw to ensure it is tight.
- Twist the flange onto the mounting flange plates.
