

Filter Driers

Danfoss

DMB Bi-Flow Series

Bi-flow filter driers have built-in check valves which ensure that refrigerant liquid always flows through the filter driers from the outer side of the filter core towards the center. Thus all dirt particles are retained irrespective of flow direction. DMB filter driers ensure fast and effective adsorption of moisture as well as organic and inorganic acids.

Solder

Cat. No.	Part No.	Model No.	Connections	Liquid Capacity kW		
				R134a	R404A, R507	R22, R407C, R410A
