

Base MK2 Basin Mixer Chrome

INSTALLATION

Note

The installation must comply with requirements of AS/NZS 3500. Mixer must be installed by a licenced plumber.

Important

Your mixer comes to you already factory assembled and tested. We do not recommend the dismantling of any internal part of the mixer. The mixers are factory tested and sealed so as to give the best performance.

1. Please flush out new pipe work prior to connecting the new mixer.
2. All mixers should be installed with isolating stop cocks (Arco brand recommended).
3. This tap is suitable for high pressure applications where both hot and cold water supply pressures are at 150kPa or above.

4. Place the washer into position.

5. Fit the tap body (7) into the basins hole making sure first that the flexible connectors (10, 11) are firmly tightened into the base of the body.

6. Do not use teflon tap on threads.

7. From underneath apply your washer prior to positioning the horse shoe plate.

8. Lock the mixer onto the basin or benchtop by tightening the lock nut.

Servicing - Replacement of Cartridge

1. Remove cap (3) and unscrew the grub screw (2) using allen key.

2. Lift off handle and remove the cartridge dome (4), unscrew brass locking nut (5) and lift out cartridge (6).

3. Replace the cartridge (6), replace the brass locking nut (5), replace the cartridge dome (4) and replace handle. Tighten grub screw (2) and push in indicator cap (3).
