

# IMPORTANT CHANGE NOTICE FOR REHAU CUSTOMERS FROM JANUARY 2020

## Re: Important note to RAUTITAN STABIL PE-X/AL/PE users regarding compatibility of new PXsr polymer fittings

- REHAU RAUTITAN STABIL users must use REHAU Brass fittings from January 2020
- PX fittings 16-40mm will be discontinued from January 2020
- PXsr fittings will replace 16-20mm PX fittings for use with RAUTITAN PE-Xa pipe only

### Dear REHAU STABIL user

In 2020 REHAU will discontinue the sale of PPSU polymer PX fittings 16-40mm and replace with a 16-20mm range of PVDF fittings. **These fittings will not be compatible with RAUTITAN (Silver) Stabil pipe. Any connection of Stabil pipe must be carried out using REHAU's Brass Fittings 16-40mm Range.**

The material change has been undertaken to improve the solvent resistance of REHAU's Polymer compression sleeve fittings. While this material is ideal for use in delivery of domestic Hot/Cold water with Pe-Xa pipe due to its benefits in hygiene, corrosion and solvent resistance it does not provide a reliable joint when combined with Stabil pipe.

It is important that all members of the installation and purchasing teams are aware of this compatibility change to avoid connection non-compliance which will impact the system warranty. Therefore we request that this notice is communicated to all stakeholders. For your peace-of-mind please circulate this note and request confirmation from employees and/or subcontractors who may be affected by this change. PVDF PXsr fittings combined with RAUTITAN Stabil pipe will not be covered by REHAU's 25year warranty.

**For more information please contact your REHAU representative, local REECE branch or visit [www.myREHAU.com](http://www.myREHAU.com)**
