

MIZU

BLISS WALL BATH MIXER SET

INSTALLATION INSTRUCTIONS

Note

Mixer must be installed to the requirements of AS/NZS 3500 by a qualified plumber. Your mixer comes to you already factory assembled and tested. We do not recommend the dismantling of any internal part of the mixer. The mixers are factory tested and sealed so as to give the best performance.

1. Please flush out new pipe work prior to connecting the new mixer.
2. This mixer is suitable for high pressure where both hot and cold water supply is at 150kPa or above.
3. During installation protect the exposed finish surface by using the plastic cover provided. Please pay attention to the minimum/maximum depth. Allow for finished wall thickness.
4. In a typical installation, the mixer is mounted on the timber/metal noggin and secured with screws (not provided).
5. Mixer must be installed with water outlet on the left as per image 1. Connect the mixer to hot and cold water supply as per markings on mixer body.
6. Pressure test all connections. Leaking joints are not covered by the warranty.
7. Push on outlet and secure with grub screw.
