# Bathroom Exhaust Vent

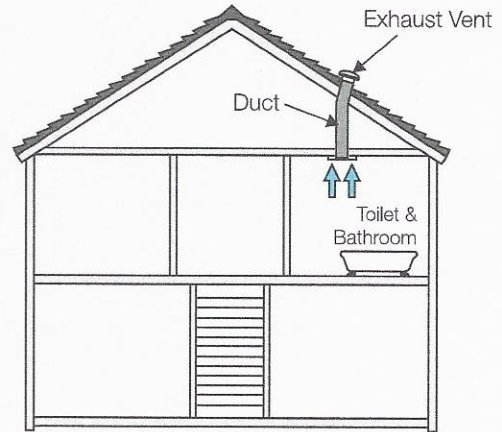

The Omega Bathroom Exhaust Vent is designed to evacuate condensation and odours from your bathroom directly outside the house.

With regulation changes no longer allowing you to vent condensation into the roof cavity, the Omega Bathroom Exhaust Vent allows installation with the use of a 5" or 6" duct pipe to ventilate to the outdoors.

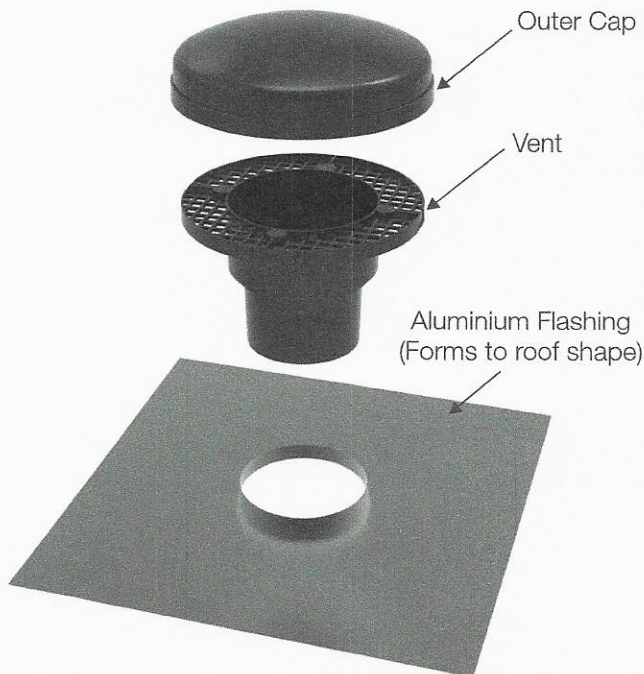

Made locally in Australia from UV Stabilised plastic, the Exhaust Vent has been designed to suit the tough Australian outdoor conditions.

The thin but durable Aluminium flashing supplied with the kit allows it to be formed for installation on either a tiled roof or metal roof for maximum diversity.

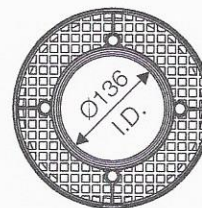

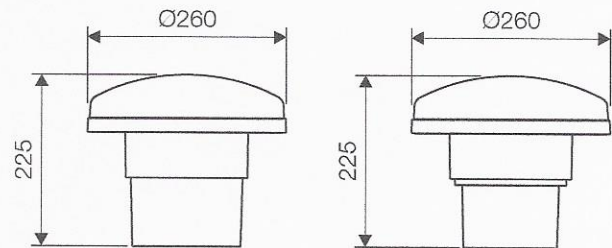

Example Installation:
