Installation

S-Trap Installation

1. Lubricate the rubber fins of the pan bend and position in the waste pipe at the required height. Fix the pan-connector back to the wall using the rod and bracket.

Note: Ensure it is level.

2. Align and push pan back to wall, connect pan spigot into waste bend ensuring firm connection.
3. Fix cistern onto pan, bucket flush and check for leaks.

Cistern Fitting

Note: Cistern Fitting are pre-set from factory. If any adjustments required to settings or for maintenance refer following.

Bottom Inlet

Note: Flexible Hose for water connection not supplied with bottom inlet variant.

Note: Inlet is reversible.

Back Inlet

or

Note: Stop Valve and Flexible Hose with Elbow supplied with Back Inlet variant.

1. Flick up the adjustable Tab (A) and adjust the height of fill valve by pulling the lower Tube (B). Then, pushing down to lock down the adjustable lever (A). The adjustable lever is locked when hearing an audible click.
2. Unscrewing nut and installing fill valve into water inlet of the cistern, adjusting the desired position and screwing nut. (Torque 3N.m). Check to ensure watertight.

Tank Fitting

- Rotating the adjustment rod can make the float move up and down to adjust the water level height.
- Clean the water supply tube. Then connect it to the fill valve and turn on the switch to supply water. Use a screwdriver to adjust the water level.

Note: Turning clockwise increases float level.

- Screw down the nut, then put the flush valve into the tank hole, be sure the gasket presses tight to the cistern, then screw the nut back to valve.
- Adjustment of whole flush level: when the whole flush float is higher, the whole flush water is less.
- Adjustment of partial flush level: when the partial flush float is higher, the partial flush water is less.

Half Flush

Full Flush

Tank Fitting

Water Inlet & Levelling Pan

- Connect rear water inlet valve using 15mm mini cistern stop supplied. Fill the cistern and ensure correct water level. For adjustment refer separate inlet valve instructions.
- Ensure back inlet connection extends 40mm from finished wall.

Note: Ensure flexible water hose connector is clear and does not interfere with any of the internal components.
