NEO BASINS

Now with complimentary
 white solid surface plug

Neo

The Neo collection offers flexible sizes and configurations to suit small powder rooms through to large family bathrooms. Neo basins can be wall mounted or partnered with cabinetry and are ordered with or without a tap hole. Neo basins feature overflows and are supplied with complimentary care kit, wall fixing bolts, pop-up waste and matching white solid surface plug.

Neo basins are produced from premium Omvivo white solid surface and are available to order with Black Softskin.

The Neo cabinets suit every Neo basin size. The generous vanity offers flexible storage with a second internal soft close drawer. The sleek, refined style is available in white and genuine timber veneer options. Every Neo cabinet is supplied with an organiser that fits snugly in the internal drawer, providing elegant and practical storage.

in Dawn solid surface

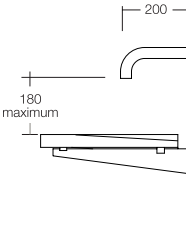

Washplane®

The Omvivo Washplane® is one of the most luxurious bathroom fittings available and is designed to simplify, yet enhance the bathroom experience.

Made in Australia, the Washplane® is supplied with hardware and unique drainage system concealed within a cavity wall. Outlets that have a cascade style aerator and a 5-7 litres per minute capacity with water falling at 90 degree angle directly onto the Washplane® top is advised. Omvivo's iconic Washplane® is designed and manufactured using superior materials to create a unique, premium quality product.

SOLID SURFACE

Omvivo basins are produced from solid surface with a matt finish.

Solid surface is produced from a blend of resins including acrylic and around 65% natural minerals. This produces a high quality solid surface product that is homogenous, meaning the basin is the same material throughout, there is no inferior coating or cheaper structure under the white finish.

Scratches, stubborn stains and even small chips can be buffed out, providing a product that will look great for years to come.

The products are easy to care for with simple cleaning instructions. Each basin is supplied with a care kit to assist in maintenance.

Each Omvivo basin is produced and finished by hand, ensuring consistent quality and a smooth matt surface.

CHOOSING OMVIVO SOLID SURFACE

As designers, makers and socially responsible members of the community, Omvivo is continuously exploring new opportunities and implementing new processes with regards to our sustainability practises.

We operate with design and production principles that ensure we always consider and plan for the full lifecycle of the products we create. We are especially focused on creating products that are functional, durable, and timeless in their appearance. This ensures that our product reach their maximum life span and demonstrate longevity in both materials and styling.

Our solid surface products are created using materials and processes that require a low amount of energy input at all stages of production. By doing this we are able to create products that have a low amount of embodied energy. When combined with the long life span of the products, this greatly reduces the environmental impact.

When quality solid surface products like Omvivo's eventually reach the end of their usable life they can be recycled, with the materials put back into the production process, unlike ceramic goods. This is done by rejuvenating the surface of the product, or breaking down the solid surface materials into chips and powder where it can be reformulated for use in new products.

Bathroom Happiness

Visit any one of our 300 showrooms around Australia for all the latest products, concepts and inspiration to make your bathroom whatever you want it to be. And for the ultimate bathroom experience, go to one of our new bathroom life™ stores where you will find the biggest range of leading Australian and international brands

Call 1800 032 566 or visit reece.com.au for you nearest bathroom showroom.
