Neo

Basins

The Neo collection offers flexible sizes and configurations to suit small powder rooms through to large family bathrooms. Neo basins can be wall mounted or partnered with cabinetry, feature overflows and can be ordered with or without a tap hole. Created in solid surface white and available with Softskin options, the Neo basins are supplied with a polished chrome pop up plug and waste and wall basin fixings bolts. Solid surface white waste cap sold separately.

Furniture

The Australian made Neo cabinets are designed to suit every size of Neo basin. The Slimline cabinet offers a sleek, uncomplicated appearance with soft close drawer. The classic Neo design features deeper soft close drawers with internal adjustable shelf, providing ample storage and flexibility.

Linea 1600 double Washplane®
in Dawn solid surface

Washplane®

The Omvivo Washplane® is one of the most luxurious bathroom fittings available and is designed to simplify, yet enhance the bathroom experience.

Made in Australia, the Washplane® is supplied with hardware and unique drainage system concealed within a cavity wall. Outlets that have a cascade style aerator and a 5-7 litres per minute capacity with water falling at 90 degree angle directly onto the Washplane® top is advised. Omvivo's iconic Washplane® is designed and manufactured using superior materials to create a unique, premium quality product.

SOLID SURFACE

Omvivo basins are produced from solid surface with a matt finish.

Solid surface is produced from a blend of resins including acrylic and around 65% natural minerals. This produces a high quality solid surface product that is homogenous, meaning the basin is the same material throughout, there is no inferior coating or cheaper structure under the white finish.

Scratches, stubborn stains and even small chips can be buffed out, providing a product that will look great for years to come.

The products are easy to care for with simple cleaning instructions. Each basin is supplied with a care kit to assist in maintenance.

Each Omvivo basin is produced and finished by hand, ensuring consistent quality and a smooth matt surface.

CHOOSING OMVIVO SOLID SURFACE

As designers, makers and socially responsible members of the community, Omvivo is continuously exploring new opportunities and implementing new processes with regards to our sustainability practises.

We operate with design and production principles that ensure we always consider and plan for the full lifecycle of the products we create. We are especially focused on creating products that are functional, durable, and timeless in their appearance. This ensures that our product reach their maximum life span and demonstrate longevity in both materials and styling.

Our solid surface products are created using materials and processes that require a low amount of energy input at all stages of production. By doing this we are able to create products that have a low amount of embodied energy. When combined with the long life span of the products, this greatly reduces the environmental impact.

When quality solid surface products like Omvivo's eventually reach the end of their usable life they can be recycled, with the materials put back into the production process, unlike ceramic goods. This is done by rejuvenating the surface of the product, or breaking down the solid surface materials into chips and powder where it can be reformulated for use in new products.
