#### **CLEANING RECOMMENDATIONS**

We recommend the use of soapy water or approved cleaners. This product should not be cleaned with abrasive materials. Damage caused by any improper treatment is not covered by the product warranty. Refer to Warranty Conditions.

Disclaimer: Products in this specification manual must by regulation be installed by licensed and registered trade people. The manufacturer/distributor reserves the right to vary specifications or delete models from their range without prior notification. Dimensions are nominal measurements only. Dimensions and set-outs listed are correct at time of publication however the manufacturer/distributor takes no responsibility for printing errors. Tech Page Version 1

## المنالك FLOW SHOWER MIXER

#### **INSTALLATION INSTRUCTIONS**

#### Note

Mixer must be installed to the requirements of AS/NZS 3500 by a qualified plumber. Your mixer comes to you already factory assembled and tested. We do not recommend the dismantling of any internal part of the mixer. The mixers are factory tested and sealed so as to give the best performance.

Mixers are recommended for use on mains pressure and instantaneous sytems only. Equal pressure for hot and cold water supply is required for this mixer.

#### Installation Procedure

- 1. Please flush out new pipe work prior to connecting the new mixer
- 2. During installation protect the exposed surface finish by using the plastic cover provided
- 3. In a typical installation, the mixer is mounted on a timber/metal noggin and secured using suitable screws through the mounting lugs
- 4. Connect mixer to hot and cold water supply
- 5. Connect to bath or shower outlet
- 6. Pressure check all connections. Leaking joints are not covered by the warranty
- 7. Recommended maximum tile cutout for cover plate not to be larger than 50mm
- 8. When the wall is finished (eg. tiling), remove the plastic cover and fit the cover plate and handle
