

# Sand Media

The most common filtration media for brighter and clearer swimming pools and spas. Ideal filtration media for in-ground and above ground pools.

> Grain size 0.5 to 2.0 mm

> Grain size 0.5 - 2.0mm

## Features

- > Specially graded 16/30 Silicia sand
- > Easy to use
- > Affordable solution for all swimming pools

## Important notes

May need to be replaced much more frequently than other types of media due to harshness of the media type.
