Mobile Pool Roller

INSTALLATION GUIDE

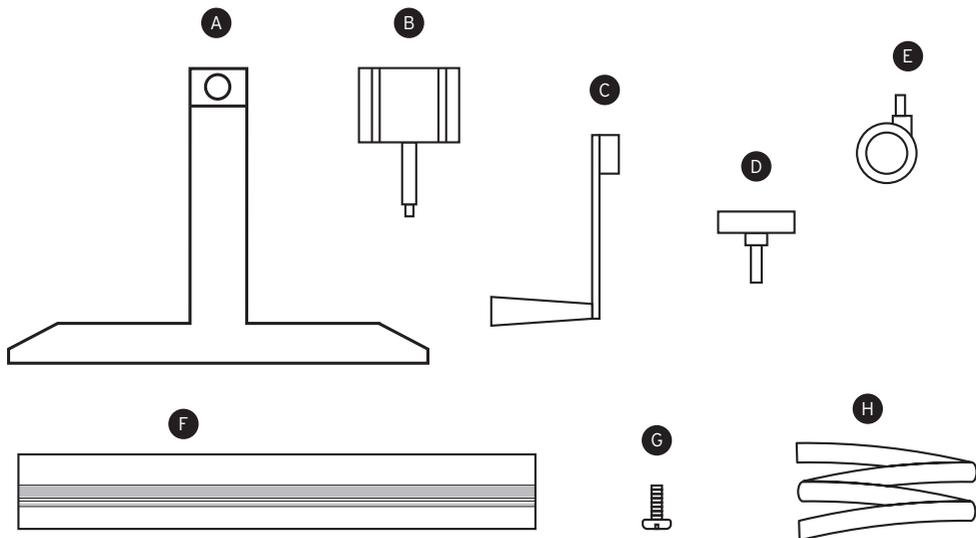

Please pass these instructions on to the owner of the pool.

The Henden Mobile Pool Roller is a sleek and portable way to handle and store your pool cover. It is a convenient, cost effective solution in keeping your swimming pool entertaining area tidy. Plus, it's lightweight and functionally designed for one person operation.

The Henden Mobile Pool Roller also comes with an approved over cover. This must always be in place when the cover is stored on your roller, as it prevents the cover from being exposed to direct sunlight when not in use.

Components of your Henden Mobile Pool Roller

A 2 x Roller Ends

B 2 x Tube Ends

C Roller Handle

D Roller Lock

E 4 x Lockable Caster Wheels

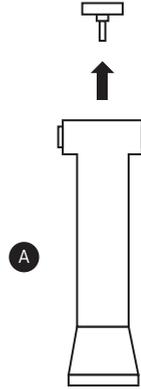

F 3 x Telescopic Tubes

G 12 x Self Tapping Screws

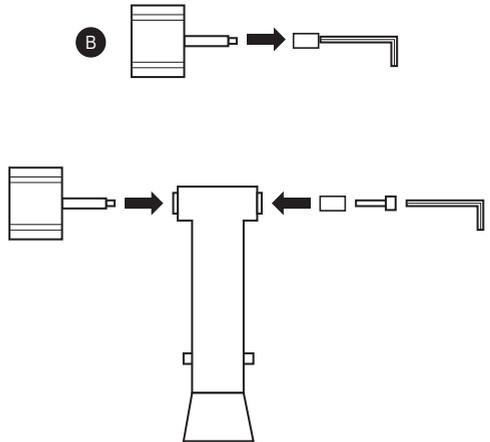

H 6 x Straps

Installing your Henden Mobile Pool Roller

1. Remove the black screws from the tops of the roller ends (A) to allow for the tube ends to slide through.

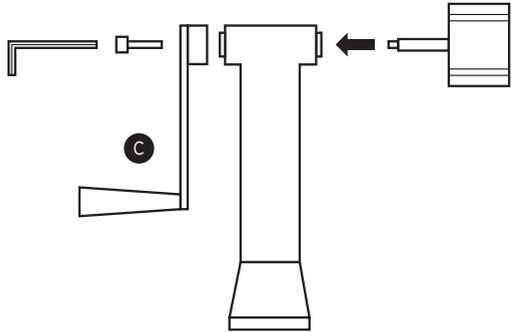

2. Remove the screws from the tube ends (B) and slide the tube ends into the roller ends from the inside. One tube end will have an aluminium piece attached to it by the screw. Once that tube end is placed through the roller end, reattach the aluminium piece with the same screw using the Allen key provided.

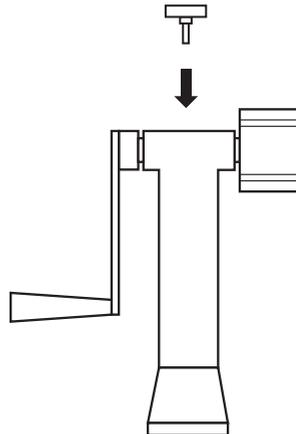

Installing your Henden Mobile Pool Roller

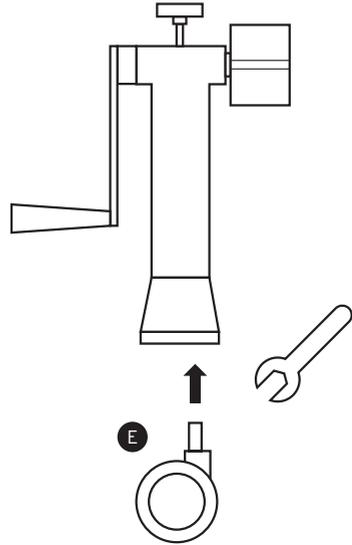

3. Place the roller handle (C) onto the other tube end without the aluminium piece. Using the screw that was removed from the tube end, screw the roller handle to the tube end using the Allen key.

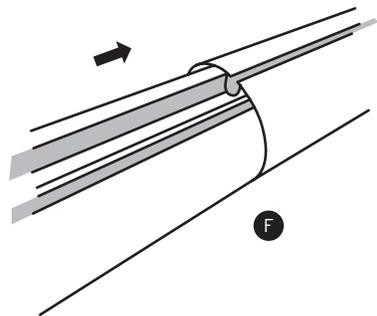

4. Screw the roller lock (D) onto the roller end, be sure to use the side with the roller handle. The black screw that was removed in the first step can be screwed back into the end without the roller lock.

5. Using the spanner provided, screw one of the lockable caster wheels (E) into the bottom of the roller end. Repeat for the other three wheels.

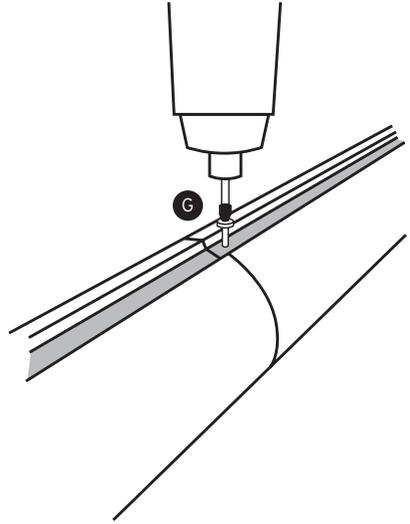

6. There are three telescopic tubes, two are slightly skinner than the other tube (F). Using the larger tube, slide the skinnier telescopic tubes into either end until you reach the desired size roller for your pool cover.

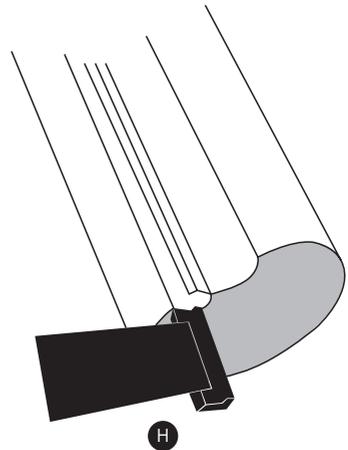

Installing your Henden Mobile Pool Roller

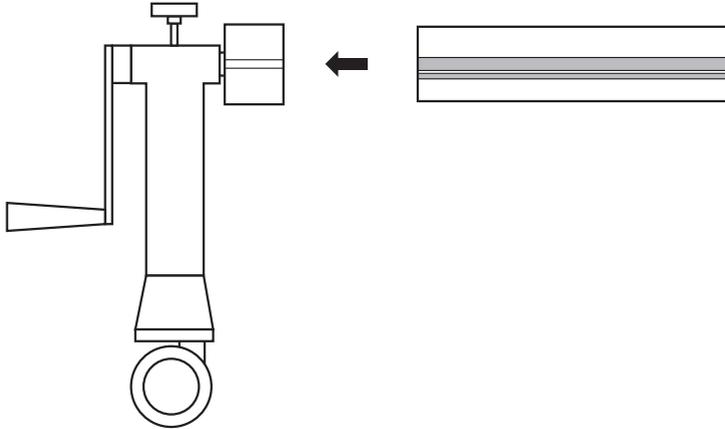

7. Once you are happy with the size of your roller, use the self tapping screws (G) on the middle tube to secure the other tubes into place using a Phillips head screwdriver. Do this on the flat ridges of the tube, two on either end. There should be a total of four screwed in.

8. Insert the six straps from the strap kit (H) into the thin opening on the tube. The placement varies on the size of your pool cover. As a guide, place two on each of the three tubes.

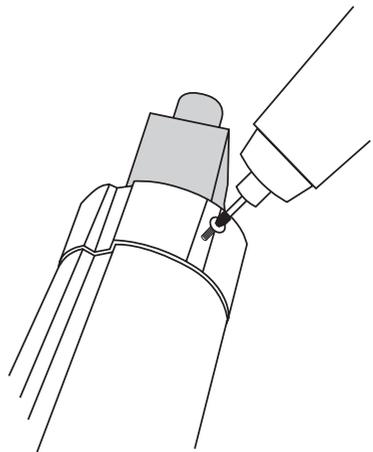

-
9. Insert the tube into the tube ends.

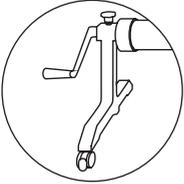

-
10. Using the self tapping screws, secure the tubes into the tube ends with a Phillips head screwdriver. Use three screws on each end.

Simply secure your cover to the straps and your Henden Mobile Pool Roller is ready to be used.

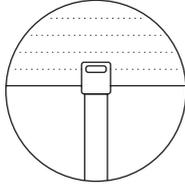

Warranty Information

Your Henden Mobile Pool Roller is covered against manufacturer defects for a total of 5 years on the complete roller and 1 year on cover straps and clips, from the original date of purchase.
