Important Pre-Installation Information

- Please read this entire instruction book before commencing installation.
- A licenced tradesman must be used for the installation.
- Ensure there is a gasket between all glass and metal components.
- Leave the plastic protectors on the glass corners until the last possible moment and handle with care.
- Instructions to install the shower tray are included with the shower tray.
- In cold climates, warming the gaskets and seals with hot water or a hairdryer will assist installation.

Maintenance

If water alone is not enough to clean the glass, Decina recommends the use of mild detergent solutions only.

Tools Required

Silicone Sealant

Drill

Level

Rubber Mallet

Pencil

Phillips Screwdriver

Tape Measure

Cutting Pliers

Utility Knife

6mm (1/4") and
3mm (1/8") Drill Bits

Safety Goggles

Gloves

* Use the correct type of drill bit for the material being drilled, with 6mm required for anchor fixing and 3mm used for screwing directly into the wall studs.

** As with all toughened glass, take care while handling and wear safety goggles and gloves for personal protection.

Determining Wall Channel Location

When commencing step 1 on the following page, please refer to this drawing and the tabulated dimensions for your size of system to assist in the correct location of the wall channels.

Size	X
900	868-878
1000	968-978
1200	1168-1178

Size	Y
900	854-866
1000	954-966

- Locate the size of your shower screen in column 1 and use the value for X and Y on the same line to find the distance from the shower wall to the outside edge of the wall channels. If a shower base is fitted, do not measure from the edge of the shower base to determine the position of the wall channel.
- If your wall and shower base are not at right angles the glass will not push fully into the wall channel at the top or bottom. This misalignment is acceptable if not exceeding 15mm, however the overall shower size will then increase by the amount of this misalignment.
