### Important Pre-Installation Information

- Please read this entire instruction book before commencing installation.
- A licensed tradesman must be used for the installation.
- Please ensure all tiles are grouted and silicone work is completed before attempting to install this product

### Maintenance

If water alone is not enough to clean the glass, Custom Glass recommends the use of mild detergent solutions only.

### Tools Required

Silicone Sealant

Drill

Level

Rubber Mallet

Pencil

Phillips Screwdriver

Tape Measure

Cutting Pliers

Utility Knife

6mm (1/4") and  
3mm (1/8") Drill Bits

Safety Goggles

Gloves

\* Use the correct type of drill bit for the material being drilled, with 6mm required for anchor fixing and 3mm used for screwing directly into the wall studs.

\*\* As with all toughened glass, take care while handling and wear safety goggles and gloves for personal protection.

### **DETAILED CLEANING INSTRUCTIONS**

#### **Easy Clean Treated Glass**

After showering we strongly recommend you squeegee the glass to remove water from the surface.

A weekly clean using water and 30% vinegar or a mild detergent is all it takes to remove dirt, soap scum and other contaminants.

Spray the vinegar and water on the glass and wipe with a soft cloth, leave this on the surface for several minutes before rinsing and drying the glass.

#### **Aluminium Frame and Metal Components**

The simplest and most preferred method of cleaning your unit is by washing with clean water and drying with a soft cloth.

Do not use Abrasive powders, steel and Teflon pads or dirty and gritty rags. The anodised coating on the Aluminium is one of the hardest substances known, however, it will be damaged by strong acidic or alkaline solutions. These solutions may dull and discolour the finish.

The most reliable preventative measure to preserve your screen is to wipe the surface dry with a soft cloth after each use.
