

Kado Era Handshower with Wall Bracket (4 Star)

Read all the installation guidelines before commencing installation. Failure to follow may void warranty. Installation shall comply with the requirements of AS/NZS 3500 series of Standards.

Hand Shower

1. Position and fixed the shower bracket onto the wall.
2. Connect one end of the shower hose into the bracket outlet and the other end to the hand shower.
3. Place the hand shower in the brakcet cradle.

GENERAL INFORMATION:

Maximum operating pressure: 500 kPa. A pressure reducing device is required if water pressure exceeds 500 kPa. Minimum operating pressure: 150 kPa. This shower is for high pressure only, may not be suitable for use with gravity-fed water heaters, low pressure supply networks, instantaneous water heaters, tempering valves and thermostatic mixing valves. Maximum water temperature: 80°C. This temperature rating is for the tapware product only. For safety and to avoid risk of scalding, please refer to your water heater instruction manual. Care should be exercised during installation to ensure that the male connecting threads do not damage the flow controller.

NOTE: Top feed inlet. Requires ½ inch male wall pipe connection.
