Threaded Fittings

Guyco Threaded Fittings

Guyco Threaded Fittings

Guyco Threaded Fittings are designed and manufactured to withstand demanding conditions. Precision heavy duty BSP threads reduce potential spiral leakage and a convenient hexagonal / octagonal design allows for simple installation and minimises the use of tools. They have a strong durable construction made from glass fibre reinforced Nylon to ensure the products are fit for purpose and suitable for use with potable water.

The male hose tails and nut and tails are used with flexible hose to provide a male and female BSP thread that can connect to a valve, another fitting or even a pump. The nut and tail has a swivel nut for easy connection with lugs to assist with the installation and reduce the need for tools.

UV Stabilised

- Will continue to perform, even in harsh sunlight conditions.

Long BSPT Threads

- Better engagement with opposing threads.

Innovative Design

- Fittings are weather, termite, fungi and bacteria resistant.

Potable Water Standard Materials

- Manufactured from materials that meet potable water standards.

Full Flow

- Minimum head loss to installation.

Large Range

- There is a fitting to adapt to most installations.

Specifications

- Pressure rating: 1600kPa (6 - 50mm) 1200kPa (65mm) 1000kPa (80 - 100mm).
- Maximum operating temperature +60°C.
- Fittings are weather, termite, fungi and bacteria resistant.

* 350KPA - "NMHT100 / 08371307100"

* 1000KPA - "Nut and Tails"

Installation

- BSP sealing threads should be joined with Teflon thread tape or an appropriate sealing compound.
- All threaded pipe work should be adequately supported with thrust blocks if necessary.
- Hose clamps are recommended for use with hose tails.
