

Zelbrite Media

High performance natural filtration media for brighter and clearer swimming pools and spas. Ideal filtration media for in-ground and above ground pools. Zelbrite upgrades standard sand filters into high performance water purifiers.

- > **Natural zeolite mineral**
Grain size 0.5 to 2mm

Features

- > Higher dirt holding capacity and the ability to remove finer particles than traditional sand and DE filters
- > Provides cleaner pool water that is visibly brighter and clearer
- > Reduces need for backwashing, saving water
- > Zelbrite performs chemical ion exchange to absorb ammonia, making the pool water safer and more appealing
- > Hard grains of Zelbrite ensure that it remains effective within the filter for over five years
- > No modifications are required to standard sand filters to accept Zelbrite
- > Zelbrite can be simply recharged to keep it performing at best
- > Natural 'buffering' characteristics of Zelbrite and the resulting lower use of disinfectants allows a lower use of chemicals for pH control
- > Zelbrite lowers the output required from salt water chlorinators, extending the cell plate life

Note: May contain traces of clay and fine particles - thoroughly backwash and rinse before first filter cycle
