HARD GRAPHITE AN URBAN DYNAMIC STYLE

Contrast or camouflage: A perfect partner for elegant pairings with pure white or blending with tone-on-tone environments. It works well with mid-tone environments such as concrete or light wood.

BRUSHED COOL SUNRISE AN EXQUISITE STATEMENT

Make a statement with Brushed Cool Sunrise. It evokes sophistication and classic luxury, bringing a modern yet vintage charm to life. Coordinate with dark, light or white interiors.

BRUSHED NICKEL THE NATURAL HARMONIC STYLE

The natural feel. Use our Brushed Nickel finishes where high quality combines with organic elements to deliver clear-headed purity and natural warmth. Harmonises with stone, light concrete or marble.

GROHE PVD UNRIVALLED, HARD AND SCRATCH RESISTANT

Made-to-last surfaces ranging from precious matte to shiny like a diamond GROHE taps are made to look as beautiful decades on as they did on the day you first fell in love with them. Our special recipe for success lies in our long-lasting surface quality. GROHE uses state-of-the-art technology to deliver exceptional quality finishes. The physical vapour deposition (PVD) process ensures that the surface composition is three times harder, delivering a glistening gold or sophisticated brushed nickel finish. As well as being harder, the surface is also ten times more scratch resistant, so it can be cherished for a lifetime. When it comes to a good design strategy, the choice of colors plays a vital part. But not only the color, the quality of the finish is equally important. Especially in the world of bathroom and kitchen solutions and

where surfaces ought to last for a long time, excellent, highly resistant finishes distinguish good products from great ones. GROHE's aspiration to always produce only the best drove us to choose a special technology that assures, not simply the best, most brilliant colours, but a durable coating of the highest quality. Our aim: to offer our consumers longlasting water enjoyment. Next to the resistance of the material, it was also about the look of the colour itself: we wanted to make Brushed Hard Graphite as dark grey as possible and give our golden finishes the brilliance they deserve. That was the task for our technology team. In close collaboration with the GROHE design team, they achieved exceptional results working with a great new technology: PVD.

THE SOURCE OF LIVING

Water is used for drinking and cooking all over the world. We use running water in the kitchen around 100 times every day! We take it so much for granted that we often don't think of water when we hear the word kitchen. We forget what has to work hardest in the kitchen: the kitchen tapware. A fixture that is used this frequently must

naturally be durable and function perfectly every day. In addition, since kitchens are increasingly becoming living spaces, it also has to look great. That is why ergonomics, functionality, aesthetics and finishes are so important in GROHE kitchen tapware. In short, this is why we refer to GROHE in the kitchen as **The Source of Living**.

THE SOURCE OF **STYLE**

Our full range of modern 'cosmopolitan' and timeless 'contemporary' style tapware offers you exactly the right tapware to match your needs and your taste. And you will want your kitchen tapware to stay looking as good as the day it was installed. GROHE Long Life Finish® chrome resists scratches and ensures a lifelong shiny finish.

THE SOURCE OF **CONVENIENCE**

Many of our models are available with pull-out sprays, a convenient and time-saving feature, either for rinsing salads, vegetables or for washing greasy pans. You will be amazed at the adaptability and flexibility of our range of professional sprays – to help make your life in the kitchen as easy as possible.

THE SOURCE OF **TECHNOLOGY**

High-quality materials, outstanding design and innovative technologies ensure that your GROHE tapware will last a lifetime. Our lever handles feature GROHE SilkMove® technology, making them extremely easy and precise to operate.

TOUCHLESS REDEFINED SENSOR TAPWARE

The benefits of Grohe Touchless.

Water Saving: Reliable, proven and precise sensor technology prevents water loss.

Design: The Euroeco Cosmopolitan E comes in a minimalistic modern format and chrome finish. This striking tap is an elegant modern addition to any public and semi-public area.

Hygiene: Touchless activation eliminates a potential source of cross contamination and spread of germs. The optimised inner waterways allow for perfect mixing of warm and cold water and cause less water stagnation in the tap.

Specific adjustments for every application: Detection range and shut-off delay can be adjusted depending on specific requirements.

GROHE EUROECO COSMOPOLITAN E SENSOR TAP

The **Cosmopolitan E** series is the perfect solution for operators of public or commercially used washrooms. The spout of the Euroeco mixer is designed at a 7 degree angle; this creates extra space below the flow control for washing hands and increases user comfort. The design is visually defined by the distinctive lozenge shape which can even be seen in the Infra Red sensor and is typical of the Cosmopolitan range of tapware from GROHE. Its simple elegance is enhanced by the seamless body, which makes it easy to clean.
