Strokes of genius and corporate spirit.

The company. Story of passion.

The biggest industrial success stories often begin with simple, innovative ideas driven by pioneers. In 1901, Hans Grohe set up his metal working company in the Black Forest in Germany. He used his knowledge and experience to design overhead showers which quickly became a household standard. In 1928, he designed and produced the first hand shower, which in turn led in 1953 to the ground-breaking shower bar.

Hans Grohe brought a spirit of innovation to a solid industrial base.

The shower bar might seem obvious to us now, but someone had to invent it, which Hansgrohe duly did in 1953.

An international benchmark

Hans' son, Klaus, successfully broadened the company's scope and it became one of the rare brands in its sector to enjoy an international reputation. Klaus was nicknamed Green Mind for his focus on the protection of the environment, a corporate value which was also applied to the products themselves, with their emphasis on reducing water and energy consumption, and to the production processes, which were designed to respect the environment.

Water is life; for Hansgrohe, sustainable development is a measurable and traceable ongoing process.

Klaus Grohe with his sons, Philippe and Richard.

Corporate values

The company today still has a close affiliation with the family and its growth is driven by the third generation of Grohes, including Philippe and Richard. Over two thirds of its 3500-strong workforce are still located in Germany, many of them in the small town of Schiltach in the Black Forest, where the enterprise started off.

Hans Grohe innovation since 1901.

Enjoy Select.

There's now a little button in the bathroom that provides a tremendous amount of pleasure.

It is a well-known fact that here at Hansgrohe, we never stop reinventing water pleasure. Once again it has clicked with the new Select technology! A simple touch of this button is all it takes for anyone to be able to enjoy their particular shower pleasure. The discreet Select button on showers and thermostats combines many of the features that our products are known for: the best design, smart functions and excellent user-friendliness. Of course, we also include these characteristics in our

bathroom and mixers for you. This turns our ideas for water into an experience in your home. In this brochure, you will discover award-winning design coupled with innovative technology and an added helping of pleasure – so happy reading!

Yours, Richard Grohe

Select: It's all in the button Croma® Select Hand Showers

Croma® Select S Multi

Various openings for different spray type
Attractive colour play in white/chrome
Easy to clean thanks to the QuickClean silicone jets

Change the spray type at the touch of a button

EcoSmart technology to reduce water consumption

Slender, ergonomic handle

Croma® Select E Multi

Full benefits, drop by drop

Croma® Select Technologies

Make Croma Select Hand Showers your first choice. The attractive design in white/chrome with the round head (S) or soft square (E) will blend elegantly with any bathroom. You will also benefit from excellent user comfort and functionality as a light touch on the Select button is all it takes to switch

through the spray types. With the EcoSmart version it is also simple to keep operating costs down. That's because the reduced water flow of 9 l/min saves precious resources.

Select - A simple click

Advantages

- Changing the spray type is easy and intuitive with the innovative Select button
- Greater comfort when showering

PHOENIX DESIGN ■

EcoSmart - Less water consumption

Advantages

- Up to 60% lower water consumption
- Lower energy requirement by saving hot water - therefore reduced CO₂ output and lower operating costs

Raindance® Showering re-thought.

Passion for water, innovations for the bathroom.

Since 1901, water has been the element that revives us, drives us, and to which we are 100% committed, body and soul. This passion flows into perfect

design and intelligent comfort – and our commitment to using our natural resources responsibly. Which is why we are constantly developing new technologies

and services to help you reduce your water consumption and increase the lifetime of your showers – as well as your showering pleasure.

EcoSmart.

Back in 1987 – long before saving water became such a big issue – Hansgrohe developed a hand shower, the Mistral Eco that used only half the amount of water and saved previous energy. Today, EcoSmart showers consume only nine or six litres per minute, and save up to 60% water and energy.

QuickClean.

All our showers have flexible silicone jets. Any deposits are quickly removed simply by rubbing a finger over them. Well looked-after limescale-free products not only look much nicer, but they also work better and last longer.

Raindance® Showering re-thought.

Passion for water, innovations for the bathroom.

AirPower.

Generous amounts of air are drawn in through the spray face. This quite literally stirs up the in-flowing water. The resulting air-enriched drops are fuller, lighter and softer. This not only feels good, but it also means that you are making the most efficient and splash-free use of your precious water.

XXL Performance.

By intelligently distributing the water over a large area, the whole body is enveloped in a feel-good shower rain. For fabulous water pleasure.

Raindance®

The loveliest rain in the world.
