Mizu Drift Wall Bath Mixer Set 200mm

IMPORTANT NOTE:

Mixer must be installed to the requirements of AS/NZS 3500 by a qualified plumber. Your mixer comes to you already factory assembled and tested. We do not recommend the dismantling of any internal part of the mixer. The mixers are factory tested and sealed so as to give the best performance.

INSTALLATION INSTRUCTIONS:

1. Flush out new pipe work prior to connecting the new mixer
2. This mixer is suitable for high pressure applications where both hot and col water supply is at 150kPa or above
3. During installation, protect the exposed finished surface by using the plastic cover provided. Please pay attention to the minimum/maximum depth and allow for finished wall thickness
4. In a typical installation, the mixer is mounter on the timber/metal noggin and secured with screws (not provided)
5. The mixer must be installed with the water outlet on the left. Connect the mixer to the hot and cold water supply as per the markings on the mixer body
6. Pressure test all connections. Leaking joints are not covered by the warranty
7. Push on outlet and secure with grub screw

CLEANING RECOMMENDATIONS:

We recommend the use of soapy water or approved cleaners. This product should not be cleaned with abrasive materials. Damage caused by any improper treatment is not covered by the product warranty. Refer to Warranty Conditions
