# LUX ENSUITE - ALL-DRAWER

## PRIOR TO INSTALLATION CHECKLIST

This product must be installed by a qualified tradesperson and we would expect the installation to be undertaken in a tradesperson like manner and finished to a tradesperson standard. This product carries a full warranty against faulty workmanship and materials.

**Please inspect thoroughly before installation to ensure that the product has not been damaged and is correct. No claims for damage or incorrect items will be recognised after installation.**

IT IS THE RESPONSIBILITY OF THE INSTALLER TO MAKE ANY ADJUSTMENTS TO DOORS/DRAWERS AFTER INSTALLATION IF REQUIRED.

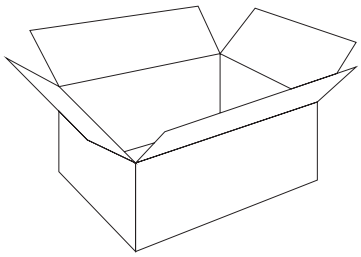
### 1 Check Products For Any Damages

Within 48 hours of receiving your goods, unpack your ADP product and check for any possible freight damages or incorrect items.

Please contact your place of purchase to report damages or missing parts.

**No claims for damages will be recognised after installation.**

Please note: fixing screws/bolts are not supplied for installation.



### 2 Positioning & Ventilation

Planning your bathroom furniture placement is critical.

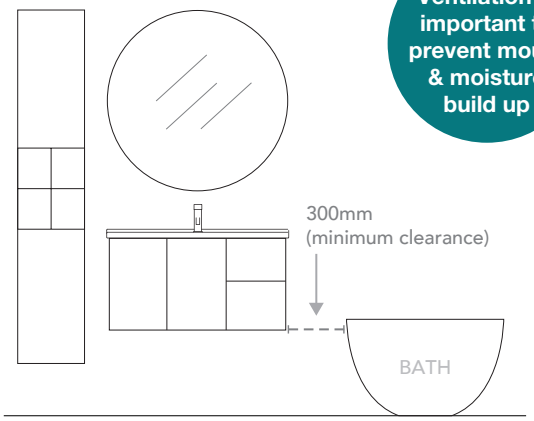
Furniture must be at least 300mm away from any wet areas. Materials used in the construction of our furntiture units are moisture resistant, not water proof.

Do not expose furniture to shower spray.

It is important that your bathroom is adequatley ventilated to eliminate moisture build up.

High humidity will lead to permanent dampness and mould resulting in a deterioration of the materials in your bathroom.

**Ventilation is important to prevent mould & moisture build up**

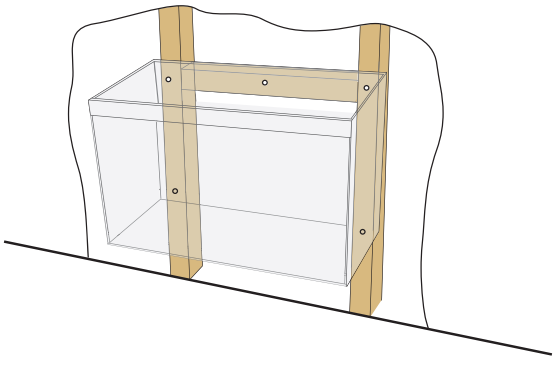


### 3 Check for Support Beams

Wall hung furniture & basins require fixing to a support beam fitted between the studs to give a solid wall backing to attach the vanity to.

If necessary, fix additional support noggins at desired height for cabinet and basin fixing prior to sheeting the wall.

Ensure total width of support noggin exceeds vanity width.



**Plumbers, please ensure a copy of the installation instructions is left with the end user for future reference**

## 4 Check for Plumb Walls & Level Floors

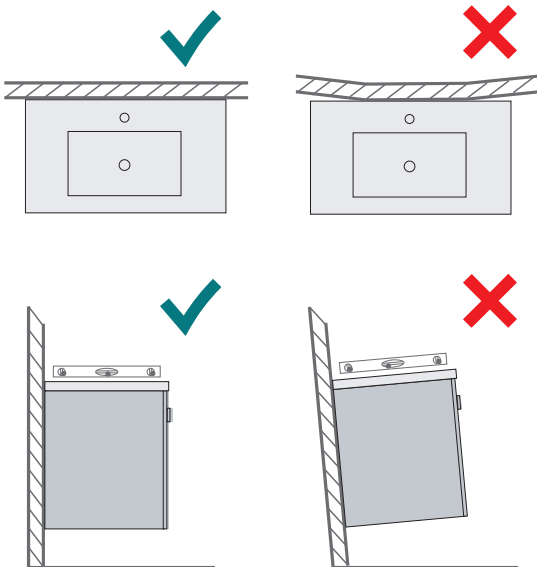
Ensure the wall is plumb and straight, ensure floor is level. If you fix the product to a non-plumb wall or floor the following could happen:

- Your door or drawers will not operate correctly.
- Door or drawers will not align.
- Basins will not sit level, which may cause water to pool or not drain properly.

If it is not possible to make the wall or floor plumb and straight you must pack the vanity out so that it does not follow the out of aligned wall.

Floor standing vanities must sit on a level floor or be packed so they sit level and true.

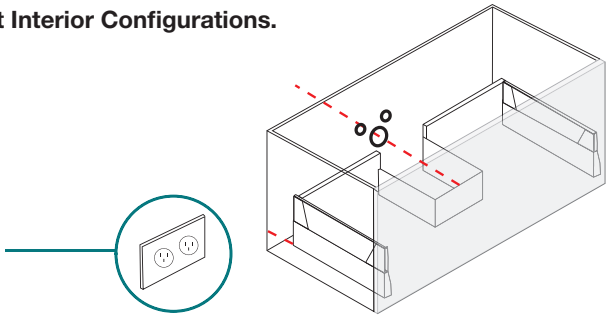
Please note if your vanity is fixed to a bowed wall, the fastening of the fixings will force your cabinet to twist and benchtop materials may crack due to increased stress on joins and materials.



## 5 Check Plumbing Positions Align with Product Interior Configurations.

Take note of clearances behind drawers when considering water supply fittings inside cabinet.

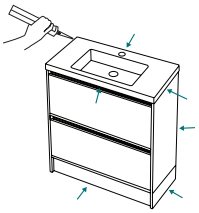
***Please note*** if your product has any electrical fittings please allow for this and talk to your electrician



## ⚠ IMPORTANT TIPS

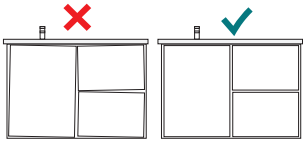
**ENSURE ALL TILES EXTEND BEHIND AND BENEATH THE BATHROOM FURNITURE.**

ADP do not recommend tiling in furniture due to moisture and mould build up which can damage the material and void the warranty.



**ALL AREAS WHERE CABINET/TOP MEETS WALL AND/OR FLOOR MUST BE SEALED USING A NEUTRAL CURE SILICONE.**

All edges where vanity top meets cabinet, wall or surrounding furniture must be sealed with a continuous bead of silicone.



**IT IS THE RESPONSIBILITY OF THE INSTALLER TO MAKE ANY ADJUSTMENTS TO DOORS/DRAWERS AFTER INSTALLATION IF REQUIRED.**

There may have been some movement in transportation and installation which causes doors/drawers to become unaligned.

**Plumbers, please ensure a copy of the installation instructions is left with the end user for future reference**

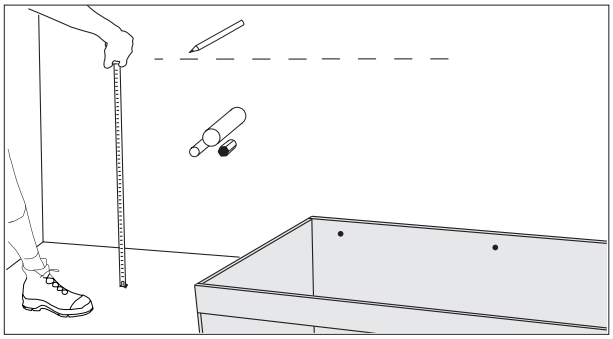
## VANITY INSTALLATION

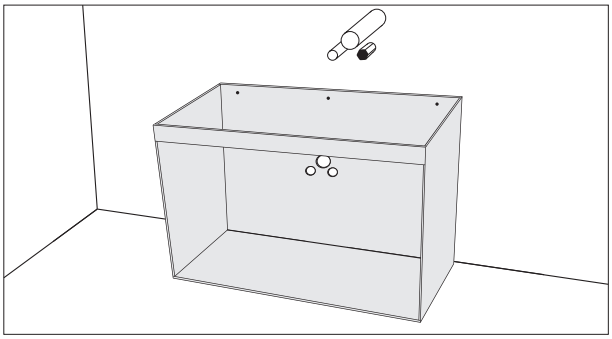
### 1. LOCATION



After completing the Prior to Installation Checklist, mark the position of the top of the vanity. Don't forget to factor in the top/basin thickness to get the correct height.

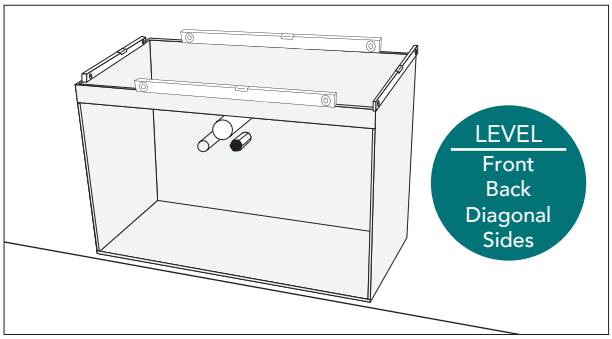
Note: Vanity must attach to a minimum of two support beams, mark these positions.

### 2. PREPARING THE CABINET



Remove doors and drawers. Measure correct plumbing loctions and drill holes for plumbing in the back panel and/or base of the cabinet with an appropriate sized hole saw. Pre-drill screw locations for fastening to wall.

### 3. LEVELING



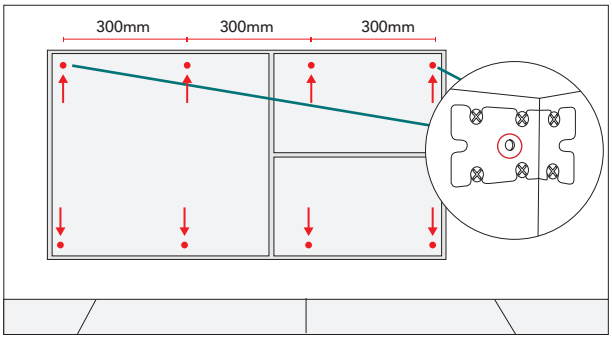
Position the vanity over the pipes in the correct position and fix with a single screw in centre of vanity to hold in place.

Check the vanity is completely level.

Wall Hung vanities: You may want use a level support/noggin to assist while leveling.

Floor Mount Vanities: You may need to pack the vanity to ensure it is sitting level & square on the floor.

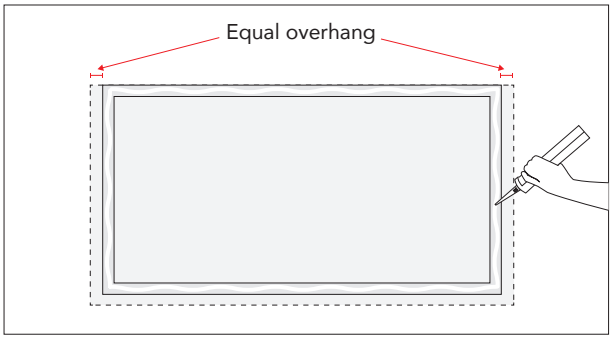
### 4. SECURING THE CABINET



Securely fasten the vanity to the wall through back of vanity with appropriate screws/bolts at TOP and BOTTOM of cabinet. Fix the cabinet through the top left and right hand brackets and evenly space apart the horizontal fixings at a maximum of 300mm apart. For the bottom start the fixing points no further than 100mm from each end of the cabinet and no higher than 50mm from the base panel.

Note: Where a stud or support beam cannot be located, use an appropriately sized hollow wall anchor. Vanity must attach to a minimum of two support beams. Ensure fixings clear all water/electrical services in wall.

### 5a. FIX TOP / BASIN

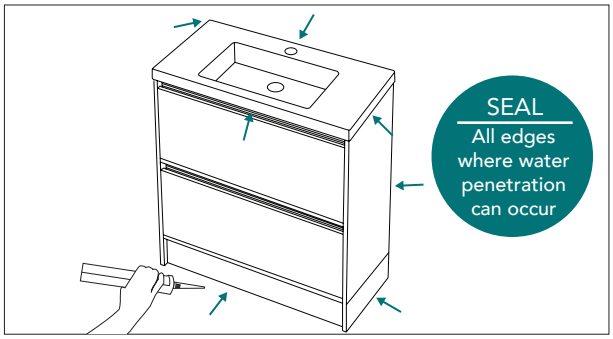


Using a non-acidic silicone, apply a continuous bead of silicone to the top four edges of the vanity and at the back where the top meets the wall. Position the top so it has equal overhang on each side, ensuring the top surface is level.

If using a seperate basin, position in place and fully seal the basin to the top /cabinet using a continuous bead of silicone.

Note: Seal any visible gaps between the cabinet and the top and basin with continuous bead of silicone.

### 6. SEALING



Apply non-acidic silicone to all edges where vanity top and cabinet meet the wall and floor.

Materials used in the construction of this unit are water resistant NOT water proof, so all areas need to be sealed to prevent water penetration.

Note: Gap sealant can be used in place of silicone where the unit meets tiled surfaces.

**Plumbers, please ensure a copy of the installation instructions is left with the end user for future reference**

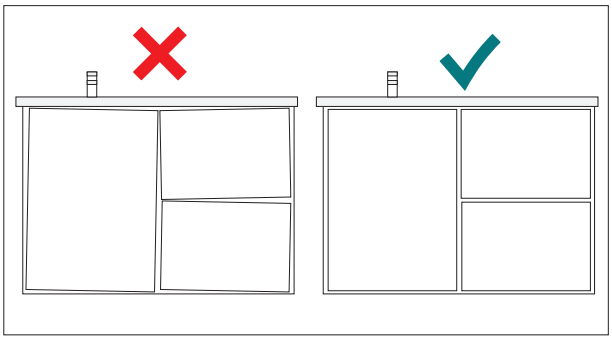
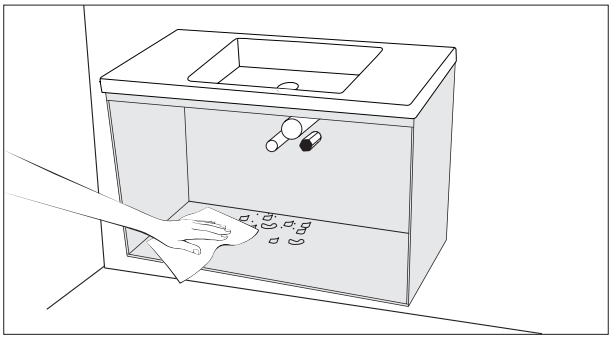
### 7. ADJUST DOORS & DRAWERS



Install drawers and doors back onto cabinet and make adjusments to align the doors and drawers correctly.

**NOTE: IT IS THE RESPONSIBILITY OF THE INSTALLER TO MAKE ANY ADJUSTMENTS TO DOORS AFTER INSTALLATION.**

### 8. CLEANING

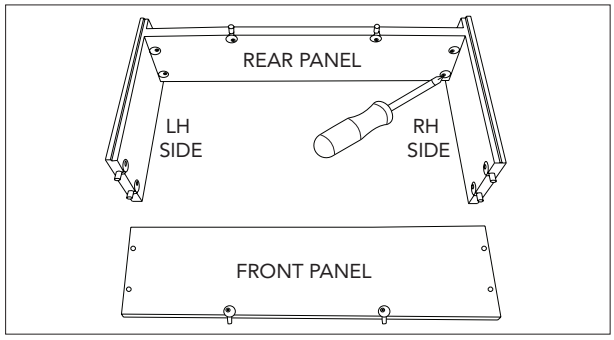


Clean all building residue from the cabinet. Dry any spillage or leakage of water on or inside the cabinet during installation.

**Note:** Ensure drawer runners are free of any debris as this may effect the operation.

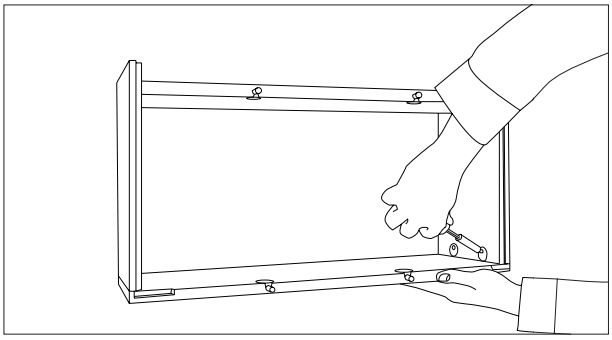
## ⚠ DETACHABLE KICKBOARD INSTALLATION

### 1. JOIN SIDE PANELS



Join each side panel with rear panel. Use a phillips head screw driver to fasten the cam-locks clockwise into the pre-drilled holes.

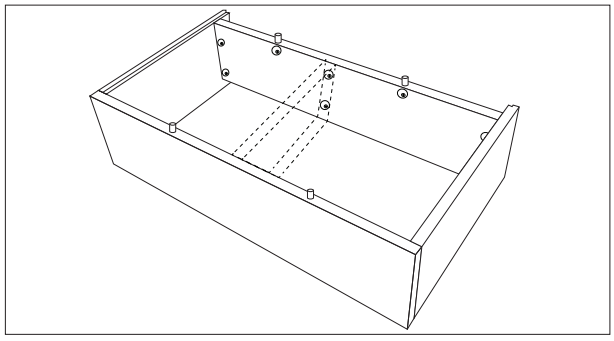
### 2. JOIN FRONT PANEL



Attach and fasten the front panel to each side panel.
Ensure all cam-locks are fastened.

**Note:** The cam-locks should be pointing directly up on the front and rear panel.

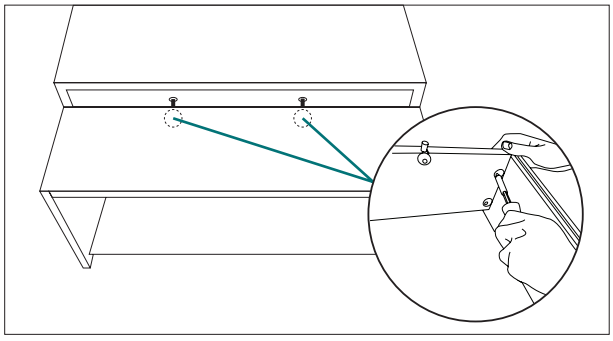
### 3. ATTACH CENTRE SUPPORT (FOR LARGER UNITS)



For larger units (1200mm and bigger), insert the centre support panel supplied and secure all cams.

Your kickboard is now assembled.

### 4. JOIN KICKBOARD TO VANITY



Carefully lay vanity unit on its back on a flat surface. Using the pre-drilled holes at the base of the unit as a guide, insert the cam-locks at the top of the kicboard and fasten to vanity unit.

Note: The cam-locks should be pointing up on the front and rear panel.

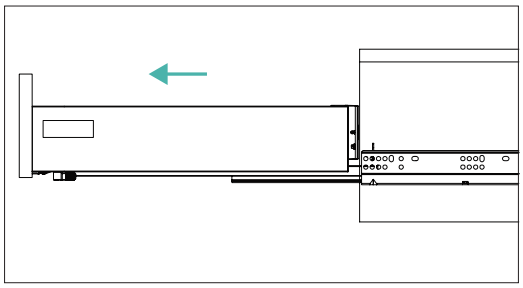
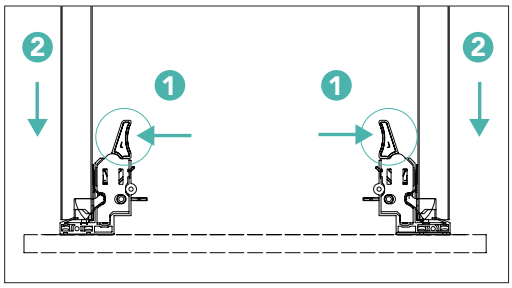
## DELUXE SOLID SIDED DRAWERS

### REMOVING DRAWER

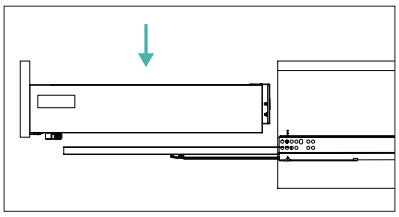


Pull drawer out.

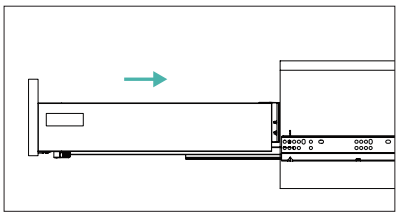


Squeeze both levers in on the underside of the drawer, at the same time (to activate release) and pull drawer out to remove.

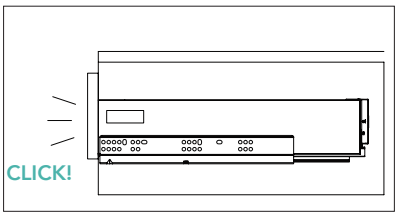
### INSERTING DRAWER



Extend drawer runners out and place drawer on runners.

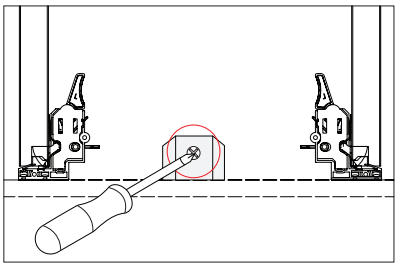


Push drawer closed until it is about 2cm out from the vanity.

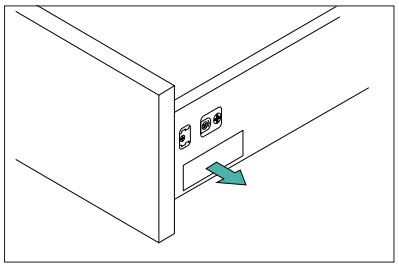


You will then need to apply a little force on the drawer front (near the bottom) to push closed and connect runners in place.

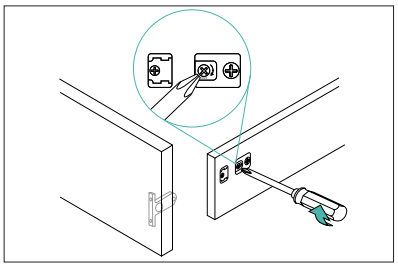
### DRAWER FRONT REMOVAL AND INSTALLATION



Depending on width of drawer you may need to unscrew and remove middle bracket on the under side of the drawer.



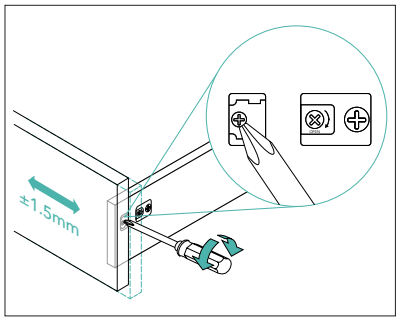
Remove cover cap to access drawer adjustments panel.



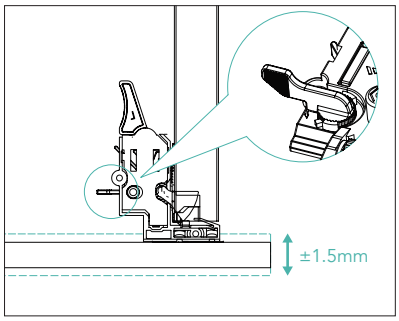
Turn release screw clockwise on either side of the drawer to release drawer front.

***To re-attach drawer front line up the brackets on the drawer front with drawer sides and push into place until you hear a click.***

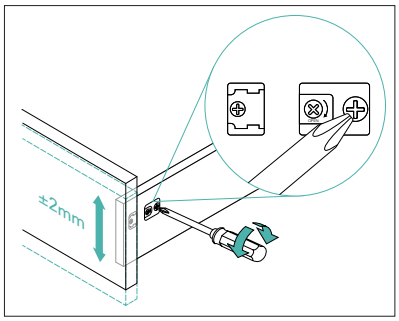
### LATERAL ADJUSTMENT



### DEPTH ADJUSTMENT



### HEIGHT ADJUSTMENT



**Plumbers, please ensure a copy of the installation instructions is left with the end user for future reference**

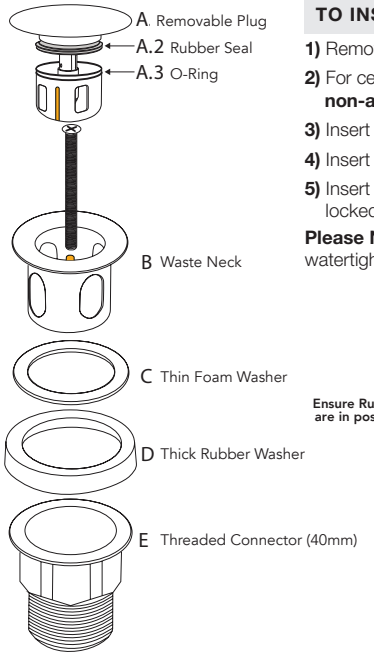
## UNIVERSAL PLUG & WASTE INSTALLATION

**Note:** All plumbing components must be installed by a licensed plumber.



### TO INSTALL

**1)** Remove washers and removable plug (A) & check waste fits in hole.

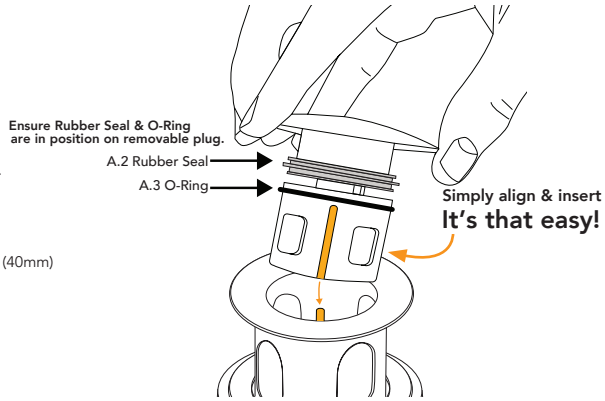
**2)** For ceramic basins - Place thin foam washer (C) in position under rim of Waste Neck (B) & seal in place with a **non-acidic silicone.** For all other basin material types, you do not need foam washer (C) before sealing in place.

**3)** Insert into centre of waste hole.

**4)** Insert Rubber Washer (D) on top of section (E) and screw on **(hand tight only).**

**5)** Insert Removable Plug (A) into the Waste Neck (B), ensuring you align the grooves until the waste is seated & locked into place.

**Please Note:** Ensure Rubber Seal (A.2) and O-Ring (A.3) are installed on Removable Plug (A) in order to provide a watertight seal.



**IMPORTANT**

Avoid overtightening waste to prevent stress & damage to the basin or top

**HAND TIGHTEN ONLY**

Must be sealed with NON-ACIDIC silicone sealant

## CARE & MAINTENANCE

If you cannot identify basin, top or cabinet material of your product, contact your merchant or see product information at www.adpaustralia.com.au.

### TIPS

- ADP products are produced from materials that are well suited to the bathroom, however it is important that your bathroom has sufficient ventilation to avoid excessive moisture. High humidity will lead to permanent dampness and mould, resulting in deterioration of the materials.
- Care must always be taken to dry any excessive moisture or water spillage.

### CABINETS

- To maintain the finish on your cabinet use only a soft cloth and weak solution of non abrasive detergent.
- To remove scratches, marks, etc. on two pack polyurethane, rub gently with car cutting compound, car polish or household brass/ silver cleaner.
- Goods used in construction are water/moisture-resistant, but not water-proof.
- All cabinets should be installed at least 300mm away from showers or bathtubs to avoid water damage.

### SOLID SURFACE / CHERRY PIE / DURASEIN / CAESARSTONE

- Wipe clean with a soft damp cloth or sponge.
- For basic stains clean with mild detergents. For **gloss and semi-gloss** surfaces you can use a non abrasive polish or Brasso. For **matte** surface use a scourer pad or scotch bright to maintain the matte finish.
- Cherry Pie and Durasein benchtops have excellent heat and chemical resistant properties compared to other surfacing products, however to preserve the surface and protect against damage from heat, do not place hot items directly on the surface. Even though Cherry Pie and Durasein can withstand high temperatures, prolonged periods or extreme heat can cause permanent damage.

**Plumbers, please ensure a copy of the installation instructions is left with the end user for future reference**
