

Glass Media

Convenient and hassle-free filtration media for brighter and clearer swimming pools and spas. Ideal filtration media for in-ground and above ground pools.

Features

- > **100% crushed recycled glass**
Hasn't been in contact with any food or beverage grade materials or products. Bacteria cannot flourish or grow within our unique glass media
- > **Non harmful to breathe**
Glass is not a carcinogenic product, creating a safer environment for all
- > **Cuts chemical usage by up to 50%**
Due to the self sterilisation nature of the glass and an oxidation process that takes place when water passes over the glass. Lowers the consumption of chlorine and coagulants
- > **Outstanding performance**
Real cost benefits over the life of a filter
- > **Up to 25% less water to backwash**
Better permeability results in easier and less backwashing time. Provides a 25% improvement in turbidity removal over sand media
- > **Less likely to block or channel**
Will not support moss or fungus growth in the media
